**Charter School Report Card** Oct 09 2021 What is a charter school? Where do they come from? Who promotes them, and why? What are they supposed to do? Are they the silver bullet to the ills plaguing the American public education system? This book provides a comprehensive and accessible overview and analysis of charter schools and their many dimensions. It shows that charter schools as a whole lower the quality of education through the privatization and marketization of education. The final chapter provides readers with a way toward rethinking and remaking education in a way that is consistent with modern requirements. Society and its members need a fully funded high quality public education system open to all and controlled by a public authority.

**Statistics for Political Analysis** Mar 02 2021 Statistics are just as vital to understanding political science as the study of institutions, but getting students to understand them when teaching a methods course can be a big challenge. Statistics for Political Analysis makes understanding the numbers easy. The only introduction to statistics book written specifically for political science undergraduates, this book explains each statistical concept in plain language—from basic univariate statistics and the basic measures of association to bivariate and multivariate regression—and uses real world political examples. Students learn the relevance of statistics to political science, how to understand and calculate statistics mathematically, and how to obtain them using SPSS. All calculations are modeled step-by-step, giving students needed practice to master the process without making it intimidating. Each chapter concludes with exercises that get students actively applying the steps and building their professional skills through data calculation, analysis, and memo writing.

**Water, Rhetoric, and Social Justice** Mar 22 2020 Water, Rhetoric, and Social Justice: A Critical Confluence examines how individuals and communities have responded on a global scale to present day water crises as matters of social justice, through oratory, mass demonstration, deliberation, testimony, and other rhetorical appeals. This book applies critical communication methods and perspectives to interrogate the pressing yet mind-boggling dilemma currently faced in environmental studies and policy: that clean water, the very stuff of life, which flows freely from the tap in affluent areas, is also denied to huge populations, materially and fluidly exemplifying the currents of justice, liberty, and equity. Contributors highlight discourse and water justice movements in nonofficial spheres from activists, artists, and the grassroots. In extending the technical, economic, moral, and political conversations on water justice, this collection applies special focus on the novel rhetorical concepts and responses not necessarily unique to but especially enacted in water justice situations. Scholars of rhetoric, sociology, activism, communication, and environmental studies will find this book particularly useful.

**Bayesian Psychometric Modeling** Sep 27 2020 A Single Cohesive Framework of Tools and Procedures for Psychometrics and Assessment Bayesian Psychometric Modeling presents a unified Bayesian approach across traditionally separate families of psychometric models. It shows that Bayesian techniques, as alternatives to conventional approaches, offer distinct and profound advantages in achieving many goals of psychometrics. Adopting a Bayesian approach can aid in unifying seemingly disparate—and sometimes conflicting—ideas and activities in psychometrics. This book explains both how to perform psychometrics using Bayesian methods and why many of the activities in psychometrics align with Bayesian thinking. The first part of the book introduces foundational principles and statistical models, including conceptual issues, normal distribution models, Markov chain Monte Carlo estimation, and regression. Focusing more directly on psychometrics, the second part covers popular psychometric models, including classical test theory, factor analysis, item response theory, latent class analysis, and Bayesian networks. Throughout the book, procedures are illustrated using examples primarily from educational assessments. A supplementary website provides the datasets, WinBUGS code, R code, and Netica files used in the examples.

**Whole School Health Through Psychosocial Emotional Learning** Dec 19 2019 15 strategies to jumpstart student and educator health With rapid technological advancements and changes to how schools must respond to learning and mental health needs, the educational landscape looks considerably different from how it did 20 years ago. How do educators contend with this everchanging future? Jared Scherz answers this question and more by outlining the 15 critical steps to educators' and students' health through psychosocial emotional learning. Designed for everyone involved in the educational system—including district administrators, teachers, students, parents, and the business community—this book provides a practical plan with steps to harmonize whole-school health, including sustainable growth in student character development, improvement of organizational health, and reduction of violence and other threats to education. A blueprint of applicable resources is provided, including: • 15 easy-to-

follow guidelines for successfully implementing social-emotional learning practices • A spotlight on issues such as empathy, identity formation, self-control, and conflict resolution • Dozens of real-world stories from educators • Anecdotal and data-driven results from successful implementation Educators today must navigate a newer and more dynamic terrain than previous generations. This book provides a practical framework for improving the satisfaction of educators, all through the lens of whole-school health.

**Linking Teacher Preparation Program Design and Implementation to Outcomes for Teachers and Students** Aug 27 2020 Improving the use of evidence in teacher preparation is one of the greatest challenges and opportunities for our field. The chapters in this volume explore how data availability, quality, and use within and across preparation programs shed light on the structures, policies, and practices associated with high quality teacher preparation. Chapter authors take on critical questions about the connection between what takes place during teacher preparation and subsequent outcomes for teachers and students – which has remained a black box for too long. Despite a long history of teacher preparation in the U.S. and a considerable investment in preservice and in-service training, much is still to be learned about how pre-service preparation impacts teacher effectiveness. A strong empirical basis that informs how specific aspects of and approaches to teacher preparation relate to outcomes for graduates and their preK-12 student outcomes will provide a foundation for improved teaching and learning. Our book responds to stakeholders' collective responsibility to students and teachers to act more deliberately. Issues of data availability and quality, the uses of data for improvement, priorities for future research, and opportunities to promote evidence use in teacher preparation are discussed throughout the volume to inspire collective action to push the field towards more use of evidence. Chapters present research that uses a variety of research designs, methodologies, and data sources to explore important questions about the relationship between teacher preparation inputs and outcomes.

**Learning to Teach in an Era of Privatization** Jun 24 2020 Education policymakers often demonstrate surprisingly little awareness of how popular reforms impact teaching and teacher education. In this book, well-regarded scholars help readers develop a more robust understanding of the nature of teacher preparation, as well as an in-depth grasp of how popular policies, practices, and ideologies have taken root domestically and internationally. Contributors include Deron Boyles, Anthony Cody, Kerry Kretchmar, Carmen Montecinos, Beth Sondel, and Christopher Tienken. "This book will help readers consider the possibilities of democratic visions in the teaching profession and in public education, particularly in this time of intense political polarization when critical citizen engagement with our public institutions and policies is deeply needed." —Janelle Scott, University of California, Berkeley "The chapters in this book make clear that ongoing policy disconnects cannot be ignored and that now is the time to elevate the teaching profession for students who have faced historical inequities." —Julian Vasquez Heilig, dean, University of Kentucky College of Education "Public teaching and teacher education in the U.S. and in many other parts of the world are under assault by concerted efforts to deregulate and marketize them. This collection of essays examines the consequences of these privatization efforts in the U.S., Chile, and Singapore and should be required reading for those wanting to understand their complexity and consequences for teaching and teacher education today." —Ken Zeichner, Boeing Professor of Teacher Education, University of Washington

**Massive Open Online Courses and Higher Education** Aug 07 2021 Since the first MOOC was launched at the University of Manitoba in 2008, this new form of the massification of higher education has been a rollercoaster ride for the university sector.

The New York Times famously declared 2012 to be the year of the MOOC. However, by 2014, the number of academic leaders who believed the model was unsustainable doubled to more than 50%. While the MOOC hype has somewhat subsided, the attitudes and anxieties of this peak time can still be seen influencing universities and their administrations. This is the first volume that addresses Massive Open Online Courses from a post-MOOC perspective. We move beyond the initial hype and revolutionary promises of the peak-MOOC period and take a sober look at what endures in an area that is still rapidly growing, albeit without the headlines. This book explores the future of the MOOC in higher education by examining what went right, what went wrong and where to next for the massification of higher education and online learning and teaching. The chapters in this collection address these questions from a wide variety of different backgrounds, methodologies and regional perspectives. They explore learner experiences, the move towards course for credit, innovative design, transformations and implications of the MOOC in turn. This book is valuable reading for students and academics interested in education, eLearning, globalisation and information services.
