*Gridiron Gourmet* May 07 2021 On football weekends in the United States, thousands of fans gather in the parking lots outside of stadiums, where they park their trucks, let down the gates, and begin a pregame ritual of drinking and grilling. Tailgating, which began in

the early 1900s as a quaint picnic lunch outside of the stadium, has evolved into a massive public social event with complex menus, extravagant creative fare, and state-of-art grilling equipment. Unlike traditional notions of the home kitchen, the blacktop is a highly masculine culinary environment in which men and the food they cook are often the star attractions. *Gridiron Gourmet* examines tailgating as shown in television, film, advertising, and cookbooks, and takes a close look at the experiences of those tailgaters who are as serious about their brisket as they are about cheering on their favorite team, demonstrating how and why the gendered performances on the football field are often matched by the intensity of the masculine displays in front of grills, smokers, and deep fryers.

Kitchen & Bath Sustainable Design provides a handbook to designing these rooms for sustainability, without sacrificing comfort or livability. With comprehensive guidance on approaching these rooms sustainably, readers will: Communicate better with builders, clients, and potential clients Understand technical considerations, and the criteria that make a design "green" Conduct a full design analysis, including life cycle costing and efficiency Learn the ratings systems and standards in play in the green kitchen and bath The biggest elements of sustainable interior design—energy efficiency, water use, and materials selection—are all major players in the kitchen and bath.
