Revenue Performance Management might be the last major bastion for corporate investment. In a world of changing buyer behavior and access to new levels of buyer understanding, companies who are serious about revenue growth now have the tools to respond appropriately. In this thoughtful, complete discussion, Steven Woods author of the acclaimed book Digital Body Language and Alex Shootman deliver a comprehensive analysis of how and when to engage buyers using revenue tools ranging from social media to field sales, how the revenue engine can be measured, and how to optimize for maximum revenue growth. Leaders... Start Your Sales Engines! Is your sales vehicle stalling, when it should be speeding across the finish line? Like an engine, your sales system was not designed to remain in the parking lot of lost opportunities. Instead, it should be driving transformational sales results and moving your sales vehicle to exciting new destinations. Unfortunately, most sales organizations lack the right sales system and are not prepared for the constant challenges that keep their sales vehicles parked. Negative perceptions, mediocre performance, poor support, and a lack of leadership round out the top issues that make acceleration difficult. Dynamic Sales COMBUSTION introduces business owners, sales leaders, sales professionals, and sales support teams to the Sales Impact System - SIS. The SIS allows you to push the pedal to the metal, create an environment that fosters high performance, and drive sales results to championship levels. The Sales Impact System - SIS provides you and your team with: • Strategies for an Unbreakable Mindset • Techniques to acquire Unparalleled Data • New ways to achieve Unstoppable Gears • The ability to develop Unmatched Structure Would you like to grow revenue faster? Whether you own a company, lead a sales team, or work in marketing, we all share the same goal: revenue growth. Unfortunately, many companies are not growing as fast as they could be. You are running marketing campaigns. Your sales team is making calls. What's keeping you from growing faster? Every company has a Revenue Growth Engine. This is the sum of their sales and marketing efforts. The problem is that most engines are not firing on all cylinders. There may even be important cylinders missing. The good news is that when your Revenue Growth Engine is performing with all cylinders firing, you accelerate revenue growth! In this book, you will quickly discover which parts of your company's growth engine are not performing. You will find a big picture model for aligning marketing and sales to drive growth. Then, Darrell walks you step by step through how to improve each component of your growth engine. Here is everything you need to know to build your own low temperature differential (LTD) Stirling engines without a machine shop. These efficient hot air engines will run while sitting on a cup of hot water, and can be fine-tuned to run from the heat of a warm hand. Four engine projects are included. Each project includes a parts list, detailed drawings, and illustrated step-by-step assembly instructions. The parts and materials needed for these projects are easily obtained from local hardware stores and model shops, or ordered online. Jim Larsen's innovative approach to Stirling engine design helps you achieve success while keeping costs low. All of the engines described in this book are based on a conventional pancake style LTD Stirling engine format. These projects introduce the use of Teflon tubing as an alternative to expensive ball bearings. An entire chapter is devoted to the research and testing of various materials for hand crafted bearings. The plans in this book are detailed and complete. This collection of engine designs is a stand-alone companion to Jim Larsen's first book, "Three LTD Stirling Engines You Can Build Without a Machine Shop." In May 2018 NASA called a press conference to announce the successful test-run of their tiny nuclear reactor KRUSTY (Kilopower Reactor Using Stirling Technology). This revolutionary technology, which runs on heat alone, may have profound consequences for the future of mankind, enabling us to maintain permanent bases on the Moon, on Mars and other planets, and eventually power a starship. On earth too it could have enormous benefits as a new way to generate power at a time when climate change is threatening our very existence. This book is the amazing story behind this invention, which began with Robert Stirling's original designs for a heat exchange engine in 1816. An invention truly ahead of its time, the practical application of the Stirling Engine has taxed the minds of scientists and inventors for almost 200 years. Only now is it possible for its full potential to be realised. Phillip Hills weaves science and history together to tell the story of one of the most exciting scientific developments the world has ever seen. The launch of Sputnik in 1957 not only began the space age, it also showed that Soviet rockets were more powerful than American ones. Within months, the US Air Force hired Rocketdyne for a feasibility study of an engine capable of delivering at least 1 million pounds of thrust. Later, NASA ran the development of this F-1 engine in order to use it to power the first stage of the Saturn V rocket that would send Apollo missions to the Moon. It is no exaggeration to say that without the F-1 engine NASA would not have been able to achieve President Kennedy's 1961 challenge to his nation to land a man on the Moon before the decade was out. Excerpt from Ericsson's Caloric Engine: General Agency and Depot for the Sale of Caloric Engines A result more important in view of the number of engines employed is exhibited on the New York Central Railroad, on the line of which there are now some 20 of these engines in daily use. Mr. Chauncey Vibbard, the Superintendent of that road, reports, over his Official signature, after several months' experience with a number of these engines, that they perform an incredible amount Of labor for the small quantity of fuel consumed. One of them, he says, for 96-100 of a cent per hour, does the work formerly done by four men, at an expense of \$25 each per month. Another of the same size, at the Savannah station, at an expense of eleven cents a day. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
