Green Boating Jul 15 2022 The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking

behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International.

Marine Diesel Engines Sep 17 2022 Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively

illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

Cognitive Interference Management in Heterogeneous Networks Oct 06 2021 This brief investigates the role of interference management in Heterogeneous Networks (Het Nets), focusing on cognitive approaches and the use of beamforming. Key concepts of Het Nets are introduced and different deployment strategies are examined, such as sharing the same frequency band of the macro cells or using new high frequency bands. Particular attention is devoted to co-channel deployment and to the problem of interference management, addressing various strategies that can be adopted to handle the interference between the cells. In addition, the brief explores cognitive small cells which are able to avoid or limit interference by using suitable beamforming and resource allocation schemes. The suggested solutions are supported by numerical results in terms of performance evaluations and comparisons.

all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In *When God Goes to Starbucks*, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today.

From Cherkassy to the Pacific Ocean Sep 05 2021 The new study of Igor Nebolsin provides end to end combat history of the Soviet 6th Guards Tank Army from its formation in January 1944 till the defeat of Nazi Germany in May 1945 and capitulation of Japan in September 1945. The 6th TA had its combat baptism at Cherkassy (Korsun) in January-February 1944 where it first played an important role in encircling units of German XI and XLII Army Corps'. Then army was on the path of the German III. Panzer Corps relief attacks of Cherkassy Pocket. In March 1944 in adverse weather conditions (rasputitsa) Army crossed South Bug, Dnestr

and Prut rivers and in April 1944 was one of the first Soviet units entered Bessarabia (Romania). During April - June 1944 6th Tank Army conducted heavy offensive and defensive battles in the area of Jassy in Northern Romania against armor units of Group Army South Ukraine which included 23. Panzer Division, 24. Panzer Division, 14. Panzer Division, Gross Deutschland Division. Although Army failed to capture Jassy and penetrate Romania it managed to withstand German attempt to destroy it in a strong counteroffensive. In August 1944 6th TA played a decisive role in the Jassy - Kishinev operation which resulted in the destruction of the 6th German Army, knocking out Romania from the WW2 as an ally of Nazi Germany, capturing Ploesti oil fields, and Bucharest. In September-October 1944 6th Tank Army was engaged in the heavy combats in Transylvania and Hungary including tank battle at Debrecen. The day by day coverage of events, honest views of the Soviet & German commanders, statistical data from both Russian and German viewpoints, and the 'human element' based on the exciting firsthand recollections of Soviet tank officers all make this study an incredibly valuable source of information. The text is fully supported by specially-commissioned color maps and an extensive selection of photographs, many from private collections.
