Emerging religions, still led by a living founder to guide them, responded with a clarity and focus that illuminates other larger, more established religions' understandings of science. The Hare Krishnas, the Unification Church, and Heaven's Gate each found distinct ways to incorporate major findings of modern American science, understanding it as central to their wider theological and social agendas. In tracing the development of these new religious movements' viewpoints on science during each movement's founding period, we can discern how their views on science were crafted over time. These NRMs shed light on how religious groups—new, old, alternative, or mainstream—could respond to the tremendous growth of power and prestige of science in late twentieth-century America. In this engrossing book, Zeller carefully shows that religious groups had several methods of creatively responding to science, and that the often-assumed conflict-based model of “science vs. religion” must be replaced by a more nuanced understanding of how religions operate in our modern scientific world. Based on over 30 years of successful teaching experience in this course, Robert Pagano's introductory text takes an intuitive, concepts-based approach to descriptive and inferential statistics. He uses the sign test to introduce inferential statistics, empirically derived sampling distributions, many visual aids, and lots of interesting examples to promote student understanding. One of the hallmarks of this text is the positive feedback from students -- even students who are not mathematically inclined praise the text for its clarity, detailed presentation, and use of humor to help make concepts accessible and memorable. Thorough explanations precede the introduction of every formula, and the exercises that immediately follow include a step-by-step model that lets students compare their work against fully solved examples. This combination makes the text perfect for students taking their first statistics course in psychology or other social and behavioral sciences. In The End of Alzheimer's Dale Bredeesen laid out the science behind his revolutionary new program that is the first to both prevent and reverse symptoms of Alzheimer's disease. Now he lays out the detailed program he uses with his own patients. Accessible and detailed, it can be tailored to anyone's needs and will enhance cognitive ability at any age. What we call Alzheimer's disease is actually a protective response to a wide variety of insults to the brain: inflammation, insulin resistance, toxins, infections, and inadequate levels of nutrients, hormones, and growth factors. Bredeesen starts by having us figure out which of these insults we need to address and continues by laying out a personalized lifestyle plan. Focusing on the Ketoflex 12/3 Diet, which triggers ketosis and lets the brain restore itself with a minimum 12-hour fast, Dr. Bredeesen drills down on restorative sleep, targeted supplementation, exercise, and brain training. He also examines the tricky question of toxic exposure and provides workarounds for many difficult problems. The takeaway is that we do not need to do the program perfectly but will see tremendous results if we can do it well enough. With inspiring stories from patients who have reversed cognitive decline and are now thriving, this book shifts the treatment paradigm and offers a new and effective way to enhance cognition as well as unprecedented hope to sufferers of this now no longer deadly disease. The fourth estate. This book explores the fraught aftermath of the German Jewish conversionary experience through the story of one family as it grapples with the meaning of its Jewish origins in a post-Holocaust, post-conversionary milieu. Utilizing archival family texts and multiple interviews

spanning three generations, beginning with the author's German Jewish parents, 1940s refugees, and engaging the insights of contemporary scholars, the book traces the impact of a contested Jewish identity on the deconstruction and reconstruction of the Jewish self. The Holocaust as post-memory and the impact of the German Jewish culture personified by the author's parents leads to a retrieval of a lost Jewish identity, postmodern in its implications, reinforcing the concept of Judaism as ultimately a family affair. Focusing on the personal to illuminate a complex historical phenomenon, this book proposes a new cultural history that challenges conventional boundaries of what is Jewish and what is not.
