Immer mehr Unternehmen beschäftigen sich mit der Frage der Wirtschaftlichkeit, des richtigen Zeitpunktes sowie der Konzeption und optimalen Ausgestaltung eines eigenen Internet-Auftritts. Allgemein besteht immer noch eine relativ hohe Unsicherheit in all diesen Fragen; gesucht werden daher Erfahrungsberichte und Musterbeispiele, die eine Orientierungsfunktion im Sinne eines Benchmarking bieten können. In diesem Buch schildern 11 besonders namhafte und erfolgreiche Unternehmen (u.a. DELL, Lufthansa, BMW, Direkt Anlage Bank, Victoria-Versicherung), welche Marktsituation, Ziele, Strategien und Gestaltungsmerkmale ihrem Internet-Auftritt zugrundeliegen und welche Erfahrungen und Erfolge bislang vorzuweisen sind. Viele der vorgestellten Online-Auftritte sind in ihrer besonderen Qualität, z.B. durch Preisverleihungen, Rankings, Besuchs- oder Umsatzerfolge, bestätigt worden. Each new edition has noted the changes in engine design and the influence of new technology and economic needs on the marine diesel engine. This eighth edition retains the directness of approach and attention to essential detail that characterized its predecessors. There are new chapters on monitoring control systems and governor systems, gas turbines and safety aspects of engine operation. Important developments such as the latest diesel-electric LNG carriers that will soon be in operation. After experience as a seagoing engineer with the British India Steam Navigation Company, Doug Woodyard held editorial positions with the Institution of Mechanical Engineers and the Institute of Marine Engineers. He subsequently edited The Motor Ship journal for eight years before becoming a freelance editor specializing in shipping, shipbuilding and marine engineering. He is currently technical editor of Seatrade, a contributing editor to Speed at Sea, Shipping World and Shipbuilder and a technical press consultant to Rolls-Royce Commercial Marine. \* Designed to reflect the recent changes to SQA/Marine and Coastguard Agency Certificate of Competency exams. Careful organisation of the new edition enables readers to access the information they require \* Brand new chapters focus on monitoring control systems and governor systems, gas turbines and safety aspects of engine operation \* High quality, clearly labelled illustrations and figures Hybrid drives and the operation of hybrid vehicles are characteristic of contemporary automotive technology. Together with the electronic driver assistant systems, hybrid technology is of the greatest importance and both cannot be ignored by today's car drivers. This technical reference book provides the reader with

a firsthand comprehensive description of significant components of automotive technology. All texts are complemented by numerous detailed illustrations. Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of competition law and its interpretation in Denmark covers every aspect of the subject – the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Denmark will welcome this very useful guide, and academics and researchers will appreciate its value in the study of international and comparative competition law.
