Better patient management starts with better documentation! Documentation for Rehabilitation: A Guide to Clinical Decision Making in Physical Therapy, 3rd Edition shows how to accurately document treatment progress and patient outcomes. Designed for use by rehabilitation professionals, documentation guidelines are easily adaptable to different practice settings and patient populations. Realistic examples and practice exercises reinforce concepts and encourage you to apply what you've learned. Written by expert physical therapy educators Lori Quinn and James Gordon, this book will improve your skills in both documentation and clinical reasoning. A practical framework shows how to organize and structure PT records, making it easier to document functional outcomes in many practice settings, and is based on the International Classification for Functioning, Disability, and Health (ICF) model - the one adopted by the APTA. Coverage of practice settings includes documentation examples in acute care, rehabilitation, outpatient, home care, and nursing homes, as well as a separate chapter on documentation in pediatric settings. Guidelines to systematic documentation describe how to identify, record, measure, and evaluate treatment and therapies - especially important when insurance companies require evidence of functional progress in order to provide reimbursement. Workbook/textbook format uses examples and exercises in each chapter to reinforce your understanding of concepts. NEW Standardized Outcome Measures chapter leads to

better care and patient management by helping you select the right outcome measures for use in evaluations, re-evaluations, and discharge summaries. UPDATED content is based on data from current research, federal policies and APTA guidelines, including incorporation of new terminology from the Guide to Physical Therapist 3.0 and ICD-10 coding. EXPANDED number of case examples covers an even broader range of clinical practice areas. As another volume in Ausmed's 'Guide to Practice' series of textbooks and audiobooks, this is an essential text for all aged-care nurses who wish to enhance their documentation skills and deliver higher quality care to the elderly. AudioBooks are ideal teaching tools. Table of Contents Foreword Introduction Ch. 1 Home health administration : an overview 3 Ch. 2 The home health agency 16 Ch. 3 Medicare conditions of participation 27 Ch. 4 The joint commission's home care accreditation program 63 Ch. 5 CHAP accreditation : standards of excellence for home care and community health organizations 71 Ch. 6 Accreditation for home care aide and private duty services 81 Ch. 7 ACHC : accreditation for home care and alternate site health care services 86 Ch. 8 Certificate of need and licensure 92 Ch. 9 Credentialing : organizational and personnel options for home care 101 Ch. 10 The relationship of the home health agency to the state trade association 111 Ch. 11 The national association for home care and hospice 115 Ch. 12 The visiting nurse association of America 124 Ch. 13 Self-care systems in home health care nursing 131 Ch. 14 Home health care documentation and record keeping 135 App. 14-A COP standards pertaining to HHA clinical record policy 147 App. 14-B Abington Memorial Hospital home care clinical records 150 Ch. 15 Computerized clinical documentation 161 Ch. 16 Home telehealth : improving care and decreasing costs 176 Ch. 17 Implementing a competency system in home care 185 Ch. 18 Meeting the need for culturally and linguistically appropriate services 211 Ch. 19 Classification : an underutilized tool for prospective payment 224 Ch. 20 Analysis and management of home health nursing caseloads and workloads 236 Ch. 21 Home health care classification (HHCC) system : an overview 247 Ch. 22 Nursing diagnoses in home health nursing 261 Ch. 23 Perinatal high-risk home care 274 Ch. 24 High technology home care services 279 Ch. 25 Discharge of a ventilator-assisted child from the hospital to home 291 Ch. 26 Performance improvement 301 Ch. 27 Evidence-based practice : basic strategies for success 310 Ch. 28 Quality planning for quality patient care 315 Ch. 29 Program Evaluation 320 App. 29-A Formats for presenting program evaluation tools Ch. 30 Effectiveness of a clinical feedback approach to improving patient outcomes 341 Ch. 31 Implementing outcome-based quality improvement into the home health agency 352 Ch. 32 Benchmarking and home health care 383 Ch. 33 Administrative policy and procedure manual 395 Ch. 34 Discharge planning 399 Ch. 35 Strategies to retain and attract quality staff 421 Ch. 36 Evaluating productivity 436 Ch. 37 Labor-management relations 448 Ch. 38 Human resource management 459 Ch. 39 Staff development in a home health agency 474 Ch. 40 Transitioning nurses to home care 484 Ch. 41 Case management 495 Ch. 42 Managed care 499 Ch. 43 Community-based long-term care : preparing for a new role 507 Ch. 44 Understanding the exposures of home health care : an insurance primer 519 Ch. 45 Budgeting for home health agencies 527 Ch. 46 Reimbursement 535 Ch. 47 How to read, interpret, and understand financial statements 549 Ch. 48 Management information systems 558 Ch. 49 Legal issues of concern to home care providers 571 Ch. 50 Understanding the basics of home health compliance 590 Ch. 51 The HIPAA standards for privacy of individually identifiable health information 616 Ch. 52 Ethical practice in the daily service to home care client, their families, and the community 666 Ch. 53 Participating in the political process 675 Ch. 54 Strategic planning 693 Ch. 55 Marketing : an overview 708 Ch. 56 The internet in home health and hospice care 723 Ch. 57 Disease management programs 736 Ch. 58 The process of visiting nurse association affiliation with a major teaching hospital 756 Ch. 59 Grantsmanship in home health care : seeking foundation support 771 Ch. 60 Home care volunteer program 778 Ch. 61 The manager as published author : tips on

"This resource will help you: Align with MDS 3.0 documentation requirements. Coordinate documentation between nurses and therapists to improve resident care. Gain the perspective of nursing or therapy to appreciate their specific approach to skilled services. Reduce your audit risk and strengthen reimbursement claims with comprehensive documentation. Prove medical necessity and need for skilled care by practicing accurate documentation"--Page 4 of cover This book is designed to introduce the reader to the fundamental information necessary for work in the clinical setting, supporting the technology used in patient care. Beginning biomedical equipment technologists can use this book to obtain a working vocabulary and elementary knowledge of the industry. Content is presented through the inclusion of a wide variety of medical instrumentation, with an emphasis on generic devices and classifications; individual manufacturers are explained only when the market is dominated by a particular unit. Designed for the reader with a fundamental understanding of anatomy, physiology, and medical terminology appropriate for their role in the health care field and assumes the reader's understanding of electronic concepts, including voltage, current, resistance, impedance, analog and digital signals, and sensors. The material covered will assist the reader in the development of his or her role as a knowledgeable and effective member of the patient care team. Because communication among health care professionals can mean the difference between patient life and death, clear and effective patient care documentation is as important as the delivery of care itself. The rehabilitation professional faces formidable documentation responsibilities. Patient care documentation created by the rehabilitation professional must be accurate, comprehensive, concise, objective, and timely. In an interdisciplinary health care environment, documentation must also be expeditiously communicated to other professionals on the health care team. Learn the skills you need to lead and succeed in the dynamic health care environments in which you will practice. From leadership and management theories through their application, you'll develop the core competences needed to deliver and manage the highest quality care for your patients. You'll also be prepared for the initiatives that are transforming the delivery and cost-effectiveness of health care today. AR 40-66 06/17/2008 MEDICAL RECORD ADMINISTRATION AND HEALTH CARE DOCUMENTATION , Survival Ebooks An excellent introductory guide for healthcare students, this book begins by exploring the current environment of health care and its component parts (professionals, disciplines, organizations, and systems) and proceeds to the concept of Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. Feeling unsure about the ins and outs of charting? Grasp the essential basics, with the irreplaceable Nursing Documentation Made Incredibly Easy!®, 5th Edition. Packed with colorful images and clear-as-day guidance, this friendly reference guides you through meeting documentation requirements, working with electronic medical records systems, complying with legal requirements, following care planning guidelines, and more. Whether you are a nursing student or a new or experienced nurse, this on-the-spot

study and clinical guide is your ticket to ensuring your charting is timely, accurate, and watertight. Let the experts walk you through up-to-date best practices for nursing documentation, with: NEW and updated, fully illustrated content in quick-read, bulleted format NEW discussion of the necessary documentation process outside of charting— informed consent, advanced directives, medication reconciliation Easy-to-retain guidance on using the electronic medical records / electronic health records (EMR/EHR) documentation systems, and required charting and documentation practices Easy-to-read, easy-to-remember content that provides helpful charting examples demonstrating what to document in different patient situations, while addressing the different styles of charting Outlines the Do's and Don'ts of charting – a common sense approach that addresses a wide range of topics, including: Documentation and the nursing process—assessment, nursing diagnosis, planning care/outcomes, implementation, evaluation Documenting the patient's health history and physical examination The Joint Commission standards for assessment Patient rights and safety Care plan guidelines Enhancing documentation Avoiding legal problems Documenting procedures Documentation practices in a variety of settings—acute care, home healthcare, and long-term care Documenting special situations—release of patient information after death, nonreleasable information, searching for contraband, documenting inappropriate behavior Special features include: Just the facts – a quick summary of each chapter's content Advice from the experts – seasoned input on vital charting skills, such as interviewing the patient, writing outcome standards, creating top-notch care plans “Nurse Joy” and “Jake” – expert insights on the nursing process and problem-solving That's a wrap! – a review of the topics covered in that chapter About the Clinical Editor Kate Stout, RN, MSN, is a Post Anesthesia Care Staff Nurse at Doshier Memorial Hospital in Southport, North Carolina. This book covers documentation procedures in acute care settings specific topics include health record law and Hippa regulations, nursing documentation, and documentation for specialty care. This book replaces Ahima's documentation requirements for the acute care patient record. Enter the world of nursing care planning with confidence! This informative guide is the perfect way to build your care planning and documentation skills. Practical and easy-to-read material covers each phase of care plan development and record-keeping for both surgical and non-surgical interventions. University of Wisconsin-Milwaukee School of Nursing's comprehensive charting and documentation manual for students and practitioners. Because health care institutions produce massive quantities of records, and because these institutions have complex interconnections with other organizations, they now need to take an active approach to selecting documentation for historical preservation. This book provides the background information necessary for archivists who deal with health care systems records to devise appropriate procedures, including a systematic method for devising institutional documentation plans (strategic plans that specify which materials should be preserved). Volume editor Joan Krizack begins by offering a general overview of the U.S. health care system and of the different settings in which care is delivered. Contributing authors then discuss the salient characteristics for archivists of health agencies and foundations; biomedical research facilities; educational institutions; professional and voluntary associations; and health industries. In the final chapter, Krizack explains how to develop and carry out a documentation plan, describing the implementation of one such plan at Children's Hospital in Boston. Handbook of Home Health Standards: Quality, Documentation, and Reimbursement includes everything the home care nurse needs to provide quality care and effectively document care based on accepted professional standards. This handbook offers detailed standards and documentation guidelines including ICD-9-CM (diagnostic) codes, OASIS considerations, service skills (including the skills of the multidisciplinary health care team), factors justifying homebound status, interdisciplinary goals and outcomes, reimbursement, and resources for practice and education. The fifth edition of this “little red book has been updated to include new information from the most recently

revised Federal Register Final Rule and up-to-date coding. All information in this handbook has been thoroughly reviewed, revised, and updated. Offers easy-to-access and easy-to-read format that guides users step by step through important home care standards and documentation guidelines. Provides practical tips for effective documentation of diagnoses/clinical conditions commonly treated in the home, designed to positively influence reimbursement from third party payors. Lists ICD-9-CM diagnostic codes, needed for completing CMS billing forms, in each body system section, along with a complete alphabetical list of all codes included in the book in an appendix. Incorporates hospice care and documentation standards so providers can create effective hospice documentation. Emphasizes the provision of quality care by providing guidelines based on the most current approved standards of care. Includes the most current NANDA-approved nursing diagnoses so that providers have the most accurate and up-to-date information at their fingertips. Identifies skilled services, including services appropriate for the multidisciplinary team to perform. Offers discharge planning solutions to address specific concerns so providers can easily identify the plan of discharge that most effectively meets the patient's needs. Lists the crucial parts of all standards that specific members of the multidisciplinary team (e.g., the nurse, social worker) must uphold to work effectively together to achieve optimum patient outcomes. Resources for care and practice direct providers to useful sources to improve patient care and/or enhance their professional practice. Each set of guidelines includes patient, family, and caregiver education so that health care providers can supply clients with necessary information for specific problems or concerns. Communication tips identify quantifiable data that assists in providing insurance case managers with information on which to make effective patient care decisions. Several useful sections make the handbook thorough and complete: medicare guidelines; home care definitions, roles, and abbreviations; NANDA-approved nursing diagnoses; guidelines for home medical equipment and supplies. Small size for convenient carrying in bag or pocket! Provides the most up-to-date information about the newest and predominant reimbursement mechanisms in home care: the Prospective Payment System (PPS) and Pay For Performance (P4P). Updated terminology, definitions, and language to reflect the federal agency change from Health Care Financing Administration (HCFA) to Centers for Medicare & Medicaid Services (CMS) and other industry changes. Includes the most recent NANDA diagnoses and OASIS form and documentation explanations. New interdisciplinary roles have been added, such as respiratory therapist and nutritionist.

> "Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)." - online AHRQ blurb, <http://www.ahrq.gov/qual/nursesdbk/>

"Written for long-term care administrators, nursing directors, health information managers, privacy and security managers and educators, this book provides a comprehensive overview and explains specific medicare and medicaid reporting requirements related to long-term care." The Personal Care Handbook also considered Survival Beyond the Caregiver is designed to assist an individual to document their medical condition in order to maintain a continuum of health when a Caregiver is needed. Upon completion it can explain in detail the medical needs regarding the medical condition and/or disability, medical concerns, all medical supplies, and how to hire a caregiver. Ms. Lopez believes that documenting your medical history and daily care will help prevent and minimize medical errors, and assist the medical team. As a parent of a young adult with multiple anomalies since birth, the challenges presented

by the professionals involved, and the many changes in the health condition as well as the transitional evolution to an adult provided the purpose for the development of this book and the hope if a transfer of care was necessary there would be a minimal break in the daily care with the medical information provided. It has insured the continuum of health of her son. The recordkeeping from a caregiver has provided invaluable information when a medical situation arose being available to share the information with the medical team, assisting with a diagnosis. She is a speaker and an advocate on the purpose of documentation and has authored Personal Medical Journal, My Personal Medical Journal, Personal Medical Pocket Journal, Personal Caregivers Handbook, and the Personal Care Handbook. Clearly and concisely provides guidelines for appropriate and careful documentation of care. Accurate documentation shows managed care companies that patients receive adequate care and that health care providers are controlling costs and resources. In addition, it plays a large role in how third party payors make payment or denial decisions. This new edition includes the latest changes and trends in nursing documentation as related to the newly restructured healthcare environment. Special attention focuses on the latest documentation issues specific to specialty settings, such as acute care, home care, and long-term care, and a variety of clinical specialties, such as obstetrics, pediatrics, and critical care.--Amazon.com. The Fifth Edition of Nursing Care Plans and Documentation provides nurses with a comprehensive guide to creating care plans and effectively documenting care. This user-friendly resource presents the most likely diagnoses and collaborative problems with step-by-step guidance on nursing action, and rationales for interventions. New chapters cover moral distress in nursing, improving hospitalized patient outcomes, and nursing diagnosis risk for compromised human dignity. The book includes over 70 care plans that translate theory into clinical practice. Online Tutoring powered by Smarthinking--Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools. Updated to include information in documenting behavioral health care treatment, this revised edition emphasizes the necessity of supportive documentation and examines its role in meeting clinical and management needs in a variety of settings. It is written for behavioral health care leaders and staff. Thoroughly updated for its Second Edition, this comprehensive reference provides clear, practical guidelines on documenting patient care in all nursing practice settings, the leading clinical specialties, and current documentation systems. This edition features greatly expanded coverage of computerized charting and electronic medical records (EMRs), complete guidelines for documenting JCAHO safety goals, and new information on charting pain management. Hundreds of filled-in sample forms show specific content and wording. Icons highlight tips and timesavers, critical case law and legal safeguards, and advice for special situations. Appendices include NANDA taxonomy, JCAHO documentation standards, and documenting outcomes and interventions for key nursing diagnoses. Designated a Doody's Core Title! The Preeminent Nursing Terminology Classification System "The Clinical Care Classification (CCC) System described in this manual is the only standard coded nursing terminology that is based on sound research using the nursing process model framework and that meets the Patient Medical Record Information (PMRI) comparability requirement. The CCC System allows patient care data generated by nurses to be incorporated into the PMRI database, and enables nurses' contributions to patient outcomes to be studied and acknowledged." -- From the Foreword by Sheryl L. Taylor, BSN, RN, Senior Consultant, Farrell Associates TESTIMONIES: "ABC Coding Solutions-Alternative Link developed ABC codes for nursing in collaboration with Dr. Virginia Saba, developer of the CCC system. Approximately two hundred ABC codes were developed from the CCC System of Nursing Interventions to accurately document nursing and integrative health care processes, classify and track clinical care, and develop evidence-based

practice models, thus filling significant gaps in older medical code sets." --Connie Koshewa, Practitioner Relations Director, ABC Coding Solutions-Alternative Link "The International Classification for Nursing Practice (ICNPÆ) is a program of the International Council of Nurses (ICN). One of the first steps in the development of the ICNPÆ was to collect and compare all the nursing concepts in existing nursing terminologies, including the CCC. To facilitate the goal of ICNPÆ as a unified nursing language system, a project is under way to map the CCC to the ICNPÆ Version 1.0. This work will facilitate evaluation and ongoing development of both terminologies and allow ICN to compare data using CCC codes with data from other standard nursing terminologies." --Amy Coenen, PhD, RN, FAAN, Director, ICNPÆ Program, International Council of Nurses

The purpose of this book is to create a system of documentation that supports the delivery of resident care. The clinical record may be either handwritten or electronic, but its purpose is to provide the activity professional with information to:

- *assess each resident's needs
- *develop a plan of care
- *establish goals to be achieved and outcomes expected
- *document interventions
- *evaluate the success or need for revision of the care plan

Throughout this book there are references specific to activity programs in nursing facilities and other situations that fall under OBRA guidelines. Federal regulations with interpretive guidelines and sections of the Resident Assessment Instrument (RAI) Version 3.0 Manual that describe documentation requirements are included. Fourth Edition, is the only text to integrate coverage of the legal responsibilities of rehabilitation professionals with basic, essential advice on how to effectively document patient care activities from intake through discharge. This resource thoroughly covers the basics of documentation and includes many exemplars, cases, and forms, as well as a sample abbreviations used in rehabilitation settings. This book covers all the bases from ethics, to practical aspects of patient care documentation, to relevant and salient legal implications and illustrative case examples that will help students excel in practice.

DOCUMENTATION SKILLS FOR QUALITY PATIENT CARE is written for students & professional nurses who want to develop or strengthen existing documentation skills. Documentation meets many needs & requirements. This book reviews those needs & outlines the regulations that nurses must adhere to. JCAHO & ANA standards of nursing practice that relate to documentation are featured. Nursing process & writing NANDA nursing diagnoses are reviewed. The book describes what needs to be documented as well as techniques, & pitfalls of documentation. Numerous examples of nursing notes, based on the author's long & varied clinical experiences, are included to guide the reader. Written in a clear & accessible style, the book is intended for use as a primer & refresher guide. A busy teacher or hospital educator could use the book as a guideline for instruction. Order from: Awareness Productions, P.O. Box 85, Tipp City, OH 45371-0085. 513-845-3617. This manual offers a quality documentation system using nursing diagnosis developed specifically for long-term care. It provides practical quality tools to guide professional nurses and interdisciplinary staff members in meeting documentation requirements under OBRA '87. (Producer) Tape 1 teaches how to change your documentation from task-based to patient focused, and three specific behaviors to improve the quality of documentation. Tape 2 teaches the four essential elements, the advantages of Focus Charting, and provides samples of interdisciplinary Focus documentation in a variety of settings. Tape 3 explores options for documenting interdisciplinary plans of care, including traditional formats, clinical pathways, and plans integrated into Focus Charting. Tape 4 reviews the essential content for documentation and the systems which increase efficiency. Includes the advantages of interdisciplinary charting, tips for success, and examples. Clinical Documentation Quick Reference for Long-Term Care Barbara Acello, MS, RN Save time while achieving accurate, comprehensive documentation for every resident in your facility This resource, designed to be used at the resident's bedside, will help nurses improve their efficiency and quality of documentation by guiding them through 150 of the most common conditions, procedures, and

situations encountered in a long-term care facility. With a detailed and comprehensive description of each symptom or condition, nurses will have a thorough list of what to check for and what to document during every shift, based on the specific circumstances of a given resident. Guarantee your residents receive the best quality of care and ensure your facility maintains compliant documentation with the help of Clinical Documentation Quick Reference for Long-Term Care. Clinical Documentation Quick Reference for Long-Term Care will: Help nurses save time while achieving accurate, comprehensive documentation for every resident in their care Provide clinicians with documentation procedures for the 150 most common conditions, procedures, and situations encountered in long-term care Aid in identifying problems and related interventions through assessment guidelines by system
