Providing essential theoretical and practical guidelines for clinicians, educators, policymakers, and public health professionals, *The Handbook of Addiction Treatment for Women* is a comprehensive resource of the most current research and knowledge from recognized experts in the field of addiction and treatment. This much needed guide offers an historical context on the issue of women and addiction, examines the myriad challenges of the female addict, and includes recommendations for choosing a course of treatment that will meet the specific needs of an individual woman addict. Constitutions worldwide inevitably have 'invisible' features: they have silences and lacunae, unwritten or conventional underpinnings, and social and political dimensions not apparent to certain observers. *The Invisible Constitution in Comparative Perspective* helps us understand these dimensions to contemporary constitutions, and their role in the interpretation, legitimacy and stability of different constitutional systems. This volume provides a nuanced theoretical discussion of the idea of 'invisibility' in a constitutional context, and its relationship to more traditional understandings of written versus unwritten constitutionalism. Containing a rich array of case studies, including discussions of constitutional practice in Australia, Canada, China, Germany, Hong Kong, Israel, Italy, Indonesia, Ireland and Malaysia, this book will look at how this aspect of 'invisible constitutions' is manifested across different jurisdictions. This 25th edition of *Research on Professional Responsibility and Ethics in Accounting* explores many aspects across professional responsibility and ethics in accounting, including balancing values vs profits, whistleblowing, earnings management, ethical financial reporting, and moral identity. Why do self-proclaimed constitutional "originalists" so regularly reach decisions with a politically conservative valence? Do "living constitutionalists" claim a license to reach whatever results they prefer, without regard to the Constitution's language and history? In confronting these questions, Richard H. Fallon reframes and ultimately transcends familiar debates about constitutional law, constitutional theory, and judicial legitimacy. Drawing from ideas in legal scholarship, philosophy, and political science, Fallon presents a theory of judicial legitimacy based on an ideal of good faith in constitutional

argumentation. Good faith demands that the Justices base their decisions only on legal arguments that they genuinely believe to be valid and are prepared to apply to similar future cases. Originalists are correct about this much. But good faith does not forbid the Justices to refine and adjust their interpretive theories in response to the novel challenges that new cases present. Fallon argues that theories of constitutional interpretation should be works in progress, not rigid formulas laid down in advance of the unforeseeable challenges that life and experience generate. *Law and Legitimacy in the Supreme Court* offers theories of constitutional law and judicial legitimacy that accept many tenets of legal realism but reject its corrosive cynicism. Fallon's account both illuminates current practice and prescribes urgently needed responses to a legitimacy crisis in which the Supreme Court is increasingly enmeshed.

Applied Linear Statistical Models 5e is the long established leading authoritative text and reference on statistical modeling. For students in most any discipline where statistical analysis or interpretation is used, *ALSM* serves as the standard work. The text includes brief introductory and review material, and then proceeds through regression and modeling for the first half, and through ANOVA and Experimental Design in the second half. All topics are presented in a precise and clear style supported with solved examples, numbered formulae, graphic illustrations, and "Notes" to provide depth and statistical accuracy and precision. Applications used within the text and the hallmark problems, exercises, and projects are drawn from virtually all disciplines and fields providing motivation for students in virtually any college. The Fifth edition provides an increased use of computing and graphical analysis throughout, without sacrificing concepts or rigor. In general, the 5e uses larger data sets in examples and exercises, and where methods can be automated within software without loss of understanding, it is so done. Containing the detail required by both the Higher and Ordinary Level student, this second edition of the bestselling *Appreciating Art* combines text and images in a modern, fresh layout, with accessible language. Learning intentions in each unit clearly outline student expectations. Chapter reviews contain thought-provoking questions and refer back to learning objectives, encouraging students to reflect on and extend learning. Further research weblinks

FREE eBook with this textbook! Focusing on research that examines both individual and organizational behavior relative to accounting, Volume 25 of *Advances in Accounting Behavioral Research* uncovers emerging theories, methods and applications. The aim of this book is to outline the main methods and techniques available to ornithologists. A general shortage of information about available techniques is greatly hindering progress in avian ecology and conservation. Currently this sort of information is disparate and difficult to locate with much of it widely dispersed in books, journals and grey literature. Sutherland and his editorial team bring together in a single authoritative source all the ornithological techniques the avian community will ever need. For use by graduate students, researchers and practising conservationists worldwide. *Bird Ecology and Conservation* is the first title in a new series of practical handbooks which include titles focusing on specific taxonomic groups as well as those describing broader themes and subjects. The series editor is William J Sutherland.

For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational

and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.
