This book, by Alexander S. White, is a complete, clearly written guide to the operation of the Nikon Coolpix P900 digital camera. The book explains all shooting modes, menus, functions, and controls of this superzoom camera, accompanied by more than 350 full-color illustrations and sample photographs. The guide shows beginning and intermediate photographers how to use the camera's many options to get the results they want. The book explains topics such as autofocus, manual focus, HDR (High Dynamic Range) photography, ISO, memory cards, and flash modes. It includes a discussion of techniques for using the P900's phenomenal zoom lens, with a maximum optical focal length of 2000mm, to full advantage. The book also discusses the camera's features for image transfer and remote control through the P900's built-in Wi-Fi network, as well as its features for adding location data to images. The book includes sample images taken with the creative settings of the camera, including the Picture Control options, which alter the color processing of images; the Scene and Special Effects shooting modes, with settings optimized for subjects such as landscapes, birds, pets, sunsets, and action shots; and the camera's features for burst shooting and time-lapse photography. In addition, the book provides introductions to topics such as infrared photography, street photography, and macro photography. The book also explains the video features of the P900, which can shoot HD video with stereo sound and can record high-speed video at rates up to 4 times normal speed. In addition, the book describes procedures for playing back images and videos in the camera and for using the Filter Effects option to add special effects to images after they have been captured. In three appendices, the book discusses accessories for the Coolpix P900, including cases, external flash units, and charging and power options. The appendices include a list of useful web sites and other resources, as well as a section with "quick tips" to help users take advantage of the camera's features in the most efficient ways possible. Provides a perfect introduction to the model, while the book, written by Nikon expert Simon Stafford, will take them even more deeply into the camera's every function. Light. It's the most transformative tool at any photographer's disposal. Whether the lens is turned to people, wildlife, or landscape, the creative use of light is often the difference between a snapshot and a powerful photograph. In *Chasing the Light: Improving Your Photography with Available Light*, renowned photographer, writer, and educator Ibarionex Perello shares his unique insights for partnering with natural light to create evocative digital images. He brings his palpable passion and personal approach rooted in decades of experience, and reveals his honed techniques for controlling focus, exposure, white balance, and sharpness to create beautiful and impactful photographs. In an industry so obsessed with gear, this book bridges the gap between the technical and the creative and returns to a personal, inspirational narrative about perceiving and photographing light. This book will enlighten photographers of all levels about • the elements of exposure, metering, and ISO • light's impact on color and controlling color balance • combining brightness, contrast, saturation, sharpness, and pattern enhancing portraits with available lighting • direction and quality of sunlight and shooting in rural and urban landscapes • the power of light in black and white This two-volume set (LNAI 8019 and LNAI 8020) constitutes the refereed proceedings of the 10th International Conference on Engineering Psychology and Cognitive Ergonomics, EPCE 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully

reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 81 contributions included in the EPCE proceedings were carefully reviewed and selected for inclusion in this two-volume set. The papers included in this volume are organized in the following topical sections: driving and transportation safety, cognitive issues in aviation, military applications, cognitive issues in health and well-being.

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services.
