This first volume in the series "Algorithms and Computation in Mathematics", is destined to become the standard reference work in the field. Manuel Bronstein is the number-one expert on this topic and his book is the first to treat the subject both comprehensively and in sufficient detail - incorporating new results along the way. The book addresses mathematicians and computer scientists interested in symbolic computation, developers and programmers of computer algebra systems as well as users of symbolic integration methods. Many algorithms are given in pseudocode ready for immediate implementation, making the book equally suitable as a textbook for lecture courses on symbolic integration. Definitive guide to implementing, managing and troubleshooting Linux networks. Detailed coverage of Linux routing, file management, directory services, security and internetworking with Samba. Research and statistics support the view that current programs are failing to keep women in the ICT field. Currently, there exist very few solutions to this growing problem. Women in IT in the New Social Era: A Critical Evidence-Based Review of Gender Inequality and the Potential for Change aims to bring this topic to the forefront of discussion about what can be done to correct this lopsided gender distribution. This reference work will be an essential guide for government professionals, students, and researchers in the ICT field looking to develop a solution to equalize the retention rate of women in these related fields. We are moving through a time of massive change, unprecedented in recorded memory, a time in which life as we know it is being turned upside down. But we do not have to travel through this often confusing and disorientating process alone, for from across the galaxies our star brothers and sisters have gathered to help us through this transformation. Many people on Earth are now being

contacted by these loving beings, receiving their words of guidance, encouragement and reassurance to share with those who as yet do not hear them. This book contains some of these messages, received by the author from the star beings of light, messages that are filled with the love and wisdom of the universe. Vidocq! Master of disguise and chief of a newly created plainclothes police force, Vidocq is a man whose name sends terror rippling through the Parisian underworld of 1818—and the inconsequential life of Hector Carpentier is violently shaken when Vidocq storms into it. A former medical student living in his mother's Latin Quarter boardinghouse, Hector finds himself dragged into a dangerous mystery surrounding the fate of the dauphin, the ten-year-old son of King Louis XVI and Marie-Antoinette presumed to have suffered a cruel death years earlier in Paris's dreaded Temple. But the truth of what happened may be even more shocking—and it will fall to an aimless young man and the most feared detective in Paris to see justice done for a frightened little boy in a black tower . . . no matter

what the cost. This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more.

present, held in the moment when thought captures it.' Kurt Diemberger's *Summits and Secrets* is a mountaineering autobiography like no other. Writing anecdotally, Diemberger provides an abstract look into his life and climbing career that is both fascinating and awe-inspiring to navigate. Known for surviving the 1986 K2 disaster – an account described in harrowing detail in his award-winning book *The Endless Knot* – Diemberger provides a captivating insight into his earlier climbs in *Summits and Secrets*. From climbing his first peak in the Tyrol mountains of Austria, to the epoch-making first ascent of Broad Peak with Hermann Buhl in 1957, and then summiting Dhaulagiri in 1960, where he became one of only two people to have made first ascents of two mountains over 8,000 metres, Diemberger recounts his experiences with wit, honesty and an infectious enthusiasm: 'Every climber knows the thrill ... the unique inexplicable tension, which the regular shapes of the mountain world awake in him: huge pyramids, enormous rectangular slabs, piled-up triangles of rock, white circles, immense squares – the thrill of simplicity of shape and outline and the excitement of mastering them, to an unbelievable extent, by his own efforts, his own power ...' *Summits and Secrets* is a must-read for those wanting an insight into the life and achievements of one of the toughest high-altitude climbers the world has ever known.

The history of the problems, construction, and success of the man-made waterway through the Appalachians. From Kelley Skovron comes a ghostly mystery that explores the little-known history of Nazi indoctrination camps in the United States. It started off small. Just a dripping outside my window. When Morgan witnesses some eerie happenings in her family's new house, at first she shrugs them off. But as the unsettling dripping noises—and the sounds of someone crying—become more frequent, she starts to get nervous. Then a neighbor asks Morgan a blood-chilling question: What's it like to live in a haunted house? It seems Morgan's new home is notorious in the town of Port Jefferson, all because of Joseph Klaus, a boy who drowned in the 1930s after vanishing from his summer camp. Morgan begins learning all she can about the Klaus boy and uncovers the little-known history of the German American Bund, a Fascist organization that indoctrinated children and forced them into labor. Klaus wasn't just escaping from any old summer camp—he was fleeing American Nazis. As Morgan discovers the heartbreaking history of her new town, she'll have to do everything she can to protect her family from the spirits it left behind. Because the ghost of Joseph Klaus is still trying to get home—even if he drowns the people living there.
