TODAY'S TECHNICIAN: AUTOMOTIVE HEATING & AIR
CONDITIONING, Fifth Edition, is an integrated, two-book set that
covers theory and hands-on content in separate Classroom and
Shop Manuals. This innovative approach allows you to learn
fundamental climate control theory, including basic physics
related to heat transfer, before applying your knowledge through
practical, hands-on shop work. Cross-references in each manual
link related material, making it easy to connect book learning to
lab and shop activity. Updated to reflect the latest trends,

technology, and relevant NATEF standards, the Fifth Edition includes new material on next-generation refrigerants such as HFO-1234yf, as well as a bold, full-color design for enhanced reader appeal. This up-to-date, technically accurate guide is a valuable resource for students and professionals seeking ASE certification, or anyone interested in the principles, components, diagnosis, and repair of modern automotive heating and air conditioning systems. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. BOTH MANUALS: Approved for public release; distribution unlimited.

DESCRIPTION. This manual contains the complete operating instructions and procedures for UH-60A, UH-60Q, UH-60L, and EH-60A helicopters. The primary mission of this helicopter is that of tactical transport of troops, medical evacuation, cargo, and reconnaissance within the capabilities of the helicopter. The observance of limitations, performance, and weight and balance data provided is mandatory. The observance of procedures is mandatory except when modification is required because of multiple emergencies, adverse weather, terrain, etc. Your flying experience is recognized and therefore, basic flight principles are not included. IT IS REQUIRED THAT THIS MANUAL BE CARRIED IN THE HELICOPTER AT ALL TIMES. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Updated to reflect the latest trends, technology, and relevant ASE Education Foundation standards,

this integrated, two-book set covers theory and hands-on content in separate Classroom and Shop Manuals. This innovative approach allows students to learn fundamental climate control theory, including basic physics related to heat transfer, before applying their knowledge through practical, hands-on shop work. Cross-references in each manual link related material, making it easy to connect classroom learning to lab and shop activity. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Central Heating: A Design and Installation Manual is a guide to modern domestic heating systems for those involved in the trade. The book discusses the benefits of heating systems, the effects of heating, the effect of insulation on comfort and cost, and the process of heat and moisture transfer. The text also describes the concepts, possibilities, and prevention of condensation; the basic heating system; and circuit hydraulics and variation. The chemical effect of water, the selection of hardware (i.e. gas-, oil-, and solid-fuel boilers; emitters; and cylinders), temperature control, and the design of a heating system are also considered. The book tackles the relationship between boiler size, system size, capital cost and running costs, as well as the installation of heating systems. The text will be invaluable to students taking up central heating installation related courses, householders considering installing central heating, and electricians.
