Phosphorus is one
of the major
nutrients limiting
the productivity of
terrestrial, wetland
and aquatic
ecosystems. Over
the last decade
several research
projects were
conducted on
Florida's
ecosystems from
state and federal
agencies and
private industry to
address water
quality issues, and
to develop
management

practices to control
nutrient loads.
Phosphorus
Biogeochemistry in
Sub-Tropical
Ecosystems is the
first thorough study
of the role of
phosphorus in
ecological health
and water quality
ever published.
Because of its vast
and extensively
studied ecosystems,
Florida has often
served as a national
laboratory on
current and future
trends in ecosystem
management. The
reader will find
studies at all levels
of biological
organization, from
the cellular to
entire ecological
communities. The
book is a definitive
study of the role
and behavior of
phosphorus
deposition in the
upland/wetland/aqu

atic environment. The papers presented in this book are organized in specific groups: ecological analysis and global issues, biogeochemical transformations, biogeochemical responses, transport processes, phosphorus management, and synthesis. Although Florida's ecosystems are used as a case study, the results presented have global applications. Known as the Official handbook of the Federal Government. This annual resource provides comprehensive information on the agencies of the legislative, judicial, and executive branches, as well as

quasi-official agencies, international organizations in which the United States participates, boards, commissions, and committees. Each agency's description consists of a list of principal officials; a summary statement of the agency's purpose and role in the Federal Government; a brief history of the agency, including its legislative or executive authority; and a description of consumer activities, contracts and grants, employment, and publications. Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region, bringing

together Orange County's most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design. Each issue features an award-winning blend of celebrity and newsmaker profiles, service journalism, and authoritative articles on dining, fashion, home design, and travel. As Orange County's only paid subscription lifestyle magazine with circulation figures guaranteed by the Audit Bureau of Circulation, Orange Coast is the definitive guidebook into the county's luxe lifestyle. A guide to the information services and

sources provided to 100 types of small business by associations, consultants, educational programs, franchisers, government agencies, reference works, statisticians, suppliers, trade shows, and venture capital firms. Sections 1-2. Keyword Index.-- Section 3. Personal author index.-- Section 4. Corporate author index.-- Section 5. Contract/grant number index, NTIS order/report number index 1-E.-- Section 6. NTIS order/report number index F-Z. Includes index. This helpful guidebook makes it easy for librarians to select the most appropriate

periodical or serial for their proposed articles. A subject index with cross references ensures quick access to the alphabetically listed titles. The Guide to Publishing Opportunities for Librarians provides the following comprehensive information for each publication listed: bibliographic entry name and address of editor to whom manuscripts should be submitted names of indexing and abstracting services which include the publication editorial aim/policy scope and content intended audience manuscript style requirements acceptance rate review procedures for submitted articles Both novice

and experienced authors will be able to quickly select the most appropriate periodical or serial for proposed articles from a wide variety of publications. In addition to the more familiar organs of national library associations, societies, and library schools, the guide also includes regional publications, newsletters, bulletins, scholarly journals, interdisciplinary and general periodicals, subject-specific publications, and electronic journals. Public, academic, special, and school librarians, as well as other information specialists seeking to publish in the

library science field, will find the Guide to Publishing Opportunities for Librarians a valuable tool for promoting professional development. Health systems should function in such a way that the amount of inappropriate care is minimized, while at the same time stinting as little as possible on appropriate and necessary care. The ability to determine and identify which care is overused and which is underused is essential to this functioning. To this end, the "RAND/UCLA Appropriateness Method" was developed in the 1980s. It has been further developed

and refined in North America and, increasingly, in Europe. The rationale behind the method is that randomized clinical trials--the "gold standard" for evidence-based medicine--are generally either not available or cannot provide evidence at a level of detail sufficient to apply to the wide range of patients seen in everyday clinical practice. Although robust scientific evidence about the benefits of many procedures is lacking, physicians must nonetheless make decisions every day about when to use them. Consequently, a method was developed that combined the best available scientific

evidence with the collective judgment of experts to yield a statement regarding the appropriateness of performing a procedure at the level of patient-specific symptoms, medical history, and test results. This manual presents step-by-step guidelines for conceptualising, designing, and carrying out a study of the appropriateness of medical or surgical procedures (for either diagnosis or treatment) using the RAND/UCLA Appropriateness Method. The manual distills the experience of many researchers in North America and Europe and presents current (as of the year 2000)

thinking on the subject. Although the manual is self-contained and complete, the authors do not recommend that those unfamiliar with the RAND/UCLA Appropriateness Method independently conduct an appropriateness study; instead, they suggest "seeing one" before "doing one." To this end, contact information is provided to assist potential users of the method. Managing sites contaminated with munitions constituents is an international challenge. Although the choice of approach and the use of Ecological Risk Assessment (ERA) tools may

vary from country to country, the assurance of quality and the direction of ecotoxicological research are universally recognized as shared concerns. Drawing on a multidisciplinary annual summary and 11 supplements. As the official handbook of the Federal Government, the United States Government Manual is the best source of information on the activities, functions, organization, and principal officials of the agencies of the Legislative, Judicial, and Executive branches. It also includes information on quasi-official agencies and international

organizations in which the United States participates. Particularly helpful for those interested in where to go and whom to contact about a subject of concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, and publications. This comprehensive bible of remodeling information and projects focuses on the significant projects that help homeowners add real value to their homes while bettering their lifestyles. Unlike other books, The Complete Photo

Guide to Home Improvement isn't diluted with basic home repairs, but gives readers foolproof instructions on more than 200 blockbuster home remodeling projects. InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.
