**The Changing Global Order** Feb 16 2020 This volume offers a comprehensive evaluation of the concept of global order, with a particular emphasis on the role of regional organisations within global governance institutions such as the United Nations. Building from a solid theoretical base it draws upon the expertise of numerous leading international scholars offering a broad array of timely and relevant case studies. These all take into consideration the historical setting, before analysing the contemporary situation and offering suggestions for potential realignments and readjustments that may be witnessed in the future. The volume adopts an interdisciplinary approach when addressing some of the most pressing issues of global governance which our global community must tackle. This presents the readers an opportunity to understand related topics such as political economy, international law, institutions of global governance, in conjunction with the academic field of International Relations (IR). It further helps students and interested readers understand the theoretical and practical foundations to the changing nature of global affairs.

*Information Security Practices for the Internet of Things, 5G, and Next-Generation Wireless Networks* Oct 26 2020 Information security practices are the backbone of smart factories, which dynamically coordinate and optimize production processes based on data produced and collected by the underlying cyber-physical systems, in terms of resource usage. Recent advances in the best practices, opportunities, challenges, and benefits of information security must be studied and considered for businesses across sectors to successfully utilize the practices in their internet of things, 5G, and next-generation wireless networks. *Information Security Practices for the Internet of Things, 5G, and Next-Generation Wireless Networks* highlights research on secure communication of 5G, internet of things, and next-generation wireless networks along with related areas to ensure secure and internet-compatible internet of things systems. The book also discusses the effects of the internet of things technologies on various situations in smart city design. Covering a range of topics such as secure communications and security evaluations, this reference work is ideal for industry professionals, business owners, engineers, researchers, scholars, practitioners, academicians, instructors, and students.

*The Routledge Handbook to Religion and Political Parties* Oct 14 2019 As religion and politics become ever more intertwined, relationships between religion and political parties are of increasing global political significance. This handbook responds to that development, providing important results of current research involving religion and politics, focusing on: democratisation, democracy, party platform formation, party moderation and secularisation, social constituency representation and interest articulation. Covering core issues, new debates, and country case studies, the handbook provides a comprehensive overview of fundamentals and new directions in the subject. Adopting a comparative approach, it examines the relationships between religion and political parties in a variety of contexts, regions and countries with a focus on Christianity, Islam, Buddhism, Judaism and Hinduism. Contributions cover such topics as: religion, secularisation and modernisation; religious fundamentalism and terrorism; the role of religion in conflict resolution and peacebuilding; religion and its connection to state, democratisation and democracy; and regional case studies covering Asia, the Americas, Europe, Sub-Saharan Africa, the Middle East and North Africa. This comprehensive handbook provides crucial information for students, researchers and professionals researching the topics of politics, religion, comparative politics, secularism, religious movements, political parties and interest groups, and religion and sociology.

**System Level ESD Co-Design** Jan 17 2020 An effective and cost efficient protection of electronic system against ESD stress pulses specified by IEC 61000-4-2 is paramount for any system design. This pioneering book presents the collective knowledge of system designers and system testing experts and state-of-the-art techniques for achieving efficient system-level ESD protection, with minimum impact on the system performance. All categories of system failures ranging from 'hard' to 'soft' types are considered to review simulation and tool applications that can be used. The principal focus of System Level ESD Co-Design is

defining and establishing the importance of co-design efforts from both IC supplier and system builder perspectives. ESD designers often face challenges in meeting customers' system-level ESD requirements and, therefore, a clear understanding of the techniques presented here will facilitate effective simulation approaches leading to better solutions without compromising system performance. With contributions from Robert Ashton, Jeffrey Dunnihoo, Micheal Hopkins, Pratik Maheshwari, David Pomerence, Wolfgang Reinprecht, and Matti Usumaki, readers benefit from hands-on experience and in-depth knowledge in topics ranging from ESD design and the physics of system ESD phenomena to tools and techniques to address soft failures and strategies to design ESD-robust systems that include mobile and automotive applications. The first dedicated resource to system-level ESD co-design, this is an essential reference for industry ESD designers, system builders, IC suppliers and customers and also Original Equipment Manufacturers (OEMs). Key features: Clarifies the concept of system level ESD protection. Introduces a co-design approach for ESD robust systems. Details soft and hard ESD fail mechanisms. Detailed protection strategies for both mobile and automotive applications. Explains simulation tools and methodology for system level ESD co-design and overviews available test methods and standards. Highlights economic benefits of system ESD co-design.

Public Administration and Policy in the Caribbean Dec 28 2020 The Caribbean is at a crucial phase in its development. Global and local pressures have seen the region losing its competitiveness, while it remains at risk of losing out on development gains made in the last few decades. These pressures are demanding improvements in the way government operates, particularly in its policy-making and administrative Identity Theft: Breakthroughs in Research and Practice Feb 10 2022 The preservation of private data is a main concern of governments, organizations, and individuals alike. For individuals, a breach in personal information can mean dire consequences for an individual's finances, medical information, and personal property. Identity Theft: Breakthroughs in Research and Practice highlights emerging perspectives and critical insights into the preservation of personal data and the complications that can arise when one's identity is compromised. This critical volume features key research on methods and technologies for protection, the problems associated with identity theft, and outlooks for the future. This publication is an essential resource for information security professionals, researchers, and graduate-level students in the fields of criminal science, business, and computer science.

Child and Adolescent Drug and Substance Abuse Jul 23 2020 By offering unique analysis and synthesis of theory, empirical research, and clinical guidance in an up-to-date and unbiased context, this book assists health and social care professionals in understanding the use of drugs and substances of abuse by children and adolescents. A comprehensive reference for health and social care professionals, the book identifies and corrects related false narratives and, with the use of the authors' combined experience of over 70 years of clinical and academic experience in drug and substance abuse, provides current pharmacotherapeutic and psychotherapeutic approaches for the treatment of alcohol or other dependence or use disorders among children and adolescents. The book also provides a useful reference for identifying brand/trade and street names of the drugs and substances of abuse commonly used by children and adolescents. Also included is a comprehensive, cross-referenced subject index. Clear, comprehensive, accessible, and fully referenced, this book will be an invaluable resource for professionals and students who aim to treat children and adolescents. Child and Adolescent Drug and Substance Abuse is the 19th clinical pharmacology and therapeutic text that the Pagliaros have written over the past 40 years and is the sixth that deals exclusively with drug and substance abuse.

**Smart Cities as Democratic Ecologies** Jun 14 2022 The concept of the 'smart city' as the confluence of urban planning and technological innovation has become a predominant feature of public policy discourse. Despite its expanding influence, however, there is little consensus on the precise meaning of a 'smart city'. One reason for this ambiguity is that the term means different things to different disciplines. For some, the concept of the 'smart city' refers to advances in sustainability and green technologies. For others, it refers to the deployment of information and communication technologies as next generation infrastructure. This volume focuses on a third strand in this discourse, specifically technology driven changes in democracy and civic engagement. In conjunction with issues related to power grids, transportation networks and urban sustainability, there is a growing need to examine the potential of 'smart cities' as 'democratic ecologies' for citizen empowerment and user-driven innovation. What is the potential of 'smart cities' to become platforms for bottom-up civic engagement in the context of next generation communication, data sharing, and application development? What are the consequences of layering public spaces with computationally mediated technologies? Foucault's notion of the panopticon, a metaphor for a surveillance society, suggests that smart technologies deployed in the design of 'smart cities' should be evaluated in terms of the ways in which they enable, or curtail, new urban literacies and emergent social practices.

**The Welsh Language Commissioner in Context** Nov 14 2019 This research monograph is the first authoritative work on the office of the Welsh Language Commissioner and the associated Welsh language regulatory and statutory regime. In setting the Commissioner in context - in Wales, the UK and internationally - the work draws upon a rich variety of source material arising from fieldwork conducted in a number of jurisdictions. The research data includes, for example, an extensive series of documents obtained under a number of Freedom of Information applications, in-depth interviews with key actors from pertinent legislatures, governments, regulatory offices, interest groups and civic society. The linguistic coverage of source material includes English and Welsh, as well as, where relevant, Irish, German, Catalan, Spanish, French and Basque, in a publication which is multi-disciplinary in approach, engaging with the scholarly and professional literature in language policy and planning, socio-legal studies and the politics of language.

The New US Strategy towards Asia Nov 07 2021 Barack Obama's "rebalancing" or "pivot" strategy, intended to demonstrate continued US commitment to the Asia-Pacific region in a variety of military, economic, and diplomatic contexts, was launched with much fanfare in 2011. Implicit in the new strategy is both a focus on China - engagement with, and containment of - and a heavy reliance by the United States on its existing friends and allies in the region in order to implement its strategy. This book explores the impact of the new strategy on America's regional friends and allies. It shows how these governments are working with Washington to advance and protect their distinct national interests, while at the same time

avoiding any direct confrontation with China. It also addresses the reasons why many of these regional actors harbour concerns about the ability of the US to sustain the pivot strategy in the long run. Overall, the book illustrates the deep complexities of the United States' exercise of power and influence in the region.

**Achieving Universal Energy Access in India** Jun 21 2020 Forty-five per cent of India's rural population is without electricity and over 85 per cent is dependent on biomass to meet its cooking needs. Projections suggest that if the present trends continue, a large section of India's rural population will remain without access to modern energy services even in 2030. It also follows that energy access is not only a critical component for reducing rural poverty and drudgery but it is also one of the fundamental conditions for holistic rural development. The book takes a critical look at the present energy policy and addresses ways to improve energy penetration. In doing so it encourages the use of renewable energy as an alternate medium, challenging the traditional power proponents.

**Managing Security Issues and the Hidden Dangers of Wearable Technologies** Jan 09 2022 Advances in mobile computing have provided numerous innovations that make people's daily lives easier and more convenient. However, as technology becomes more ubiquitous, corresponding risks increase as well. Managing Security Issues and the Hidden Dangers of Wearable Technologies examines the positive and negative ramifications of emerging wearable devices and their potential threats to individuals, as well as organizations. Highlighting socio-ethical issues, policy implementation, and appropriate usage, this book is a pivotal reference source for professionals, policy makers, academics, managers, and students interested in the security and privacy implications of wearable digital devices.

**A Stakeholder Approach to Managing Food** Sep 24 2020 This research anthology explores the concept of food production and supply, from farm gate to plate, bringing together contemporary thinking and research on local, national, and global issues from a stakeholder perspective. A Stakeholder Approach to Managing Food includes a number of sections to represent these challenges, opportunities, conflicts, and cohesions affecting relevant stakeholder groups within food production and supply and their reaction to, engagement with, and co-creation of the food environment. For some, local, national, and global interests may seem at odds. We are in an era of growing and pervasive multi-national corporations, and these corporations have significant influence at all levels. Rapidly growing economies such as China are a focus for the global brand, but is this a scenario of adaptation or homogenization of food? Alongside this trend toward national and global development in food, this volume presents the counter-reaction that is taking place (especially in developed countries) toward local speciality and culturally bound foods, with emphasis on the importance of the inter-connection of local communities and agri-food culture and economy. With an in-depth analysis of agricultural businesses, this book shows that the entrepreneurial spirit is alive and well in rural communities with often renewed and engaged connection with consumers and imaginative use of new media. This book will be of interest to students, researchers and policy-makers concerned with agriculture, food production and economics, cultural studies.

**Projecting Resilience Across the Mediterranean** Apr 19 2020 This book examines the strategies pursued by the North Atlantic Treaty Organization (NATO) and the European Union (EU) to foster resilience in the Middle East, Maghreb and Sahel regions, ranging from military operations to humanitarian assistance. Thanks to its constructive ambiguity, resilience can bring together policy communities and connect sponsors of reform with local societies, but also bridge rifts between and within the EU and NATO. However, existing resilience-based policies are fraught with policy, theoretical and normative dilemmas. This volume examines these dilemmas by including international relations, European politics and area studies scholars, as well as practitioners from armed forces, international organisations, humanitarian NGOs and think tanks.

**Global Development and Human Rights** Jul 15 2022 From 2000 to 2015 the Millennium Development Goals (MDGs) mobilized external aid to finance life-changing services in the global South. However, in doing so, the organization failed to meet the challenges often associated with human rights initiatives, which are to make underprivileged communities independently prosperous, equitable, and sustainable. In Global Development and Human Rights, Paul Nelson assesses the current thirty-year effort to make transformative changes in the global South by exploring how this disconnect from human rights weakened the MDGs reputation as a successful aid organization. To overcome the failings of the MDGs, the Sustainable Development Goals (SDGs) were formed in 2016 with the intention of managing the issues fundamentally ignored by the MDGs. Drawing on twenty-five years of research on development goals, human rights, and the organizations that promote them, Nelson reasons that transformative change arises out of national and local movements, and shows how human rights can offer leverage and political support that help drive transformative national initiatives.

**The Value of Comparative Federalism** May 21 2020 This book explores new avenues of international

research in comparative federal studies. It re-examines the conceptual tools and methodologies for understanding federal systems, and the role of comparative federalism in the dissemination and implementation of federal concepts. It highlights the influence of comparative federalism on constitution-making as well as constitutional reforms. The volume provides innovative and pragmatic perspectives from both the Global North and the Global South, with case studies drawn from established federations such as India, Canada, Australia, and Austria, and emerging federal systems such as Italy and South Africa. Advocating a combined approach that integrates modern and traditional theoretical routes with practical insights and contemporary analyses, it discusses the issues of multilevel elections and federal governance; coalition governments and multiparty democracy in parliamentary federal systems, such as India; minority empowerment; gender budgeting; self-governance; multinational federalism; unitary states; the nation-state; and degenerating federalism. It also breaks new ground by looking at federalism from a gender perspective and deals with tools for measuring fiscal responsibility, and a social and cultural index. A tribute to the intellectual legacy of Ronald L. Watts, this volume will be useful to scholars and researchers of political science, federalism, comparative federal studies, political studies, comparative politics, governance, public administration and law, development studies, South Asian studies, and Global South and North studies as well as policymakers, international government bodies, research institutes, development experts, and other organisations working in the area.

*A Handbook for Teaching and Learning in Higher Education* Mar 19 2020 This entirely new edition of a very successful book focuses on developing professional academic skills for supporting and supervising student learning and effective teaching. It is built on the premise that the roles of those who teach in higher education are complex and multi-faceted. *A Handbook for Teaching and Learning in Higher Education* is sensitive to the competing demands of teaching, research, scholarship, and academic management. The new edition reflects and responds to the rapidly changing context of higher education and to current understanding of how to best support student learning. Drawing together a large number of expert authors, it continues to feature extensive use of case studies that show how successful teachers have implemented these ideas. It includes key topics such as student engagement and motivation, internationalisation, employability, inclusive strategies for teaching, effective use of technology and issues relating to postgraduate students and student retention. Part 1 explores a number of aspects of the context of UK higher education that affect the education of students, looking at the drivers of institutional behaviours and how to achieve success as a university teacher. Part 2 examines learning, teaching and supervising in higher education and includes chapters on working with diversity, encouraging independent learning and learning gain. Part 3 considers approaches to teaching and learning in different disciplines, covering a full range including arts and humanities, social sciences, experimental sciences through to medicine and dentistry. Written to support the excellence in teaching and learning design required to bring about student learning of the highest quality, this will be essential reading for all new lecturers, particularly anyone taking an accredited course in teaching and learning in higher education, as well as those experienced lecturers who wish to improve their teaching practice. Those working in adult learning and educational development will also find the book to be a particularly useful resource. In addition it will appeal to staff who support learning and teaching in various other roles.

[Flash](#) Jun 02 2021 How Flash rose and fell as the world's most ubiquitous yet divisive software platform, enabling the development and distribution of a world of creative content. Adobe Flash began as a simple animation tool and grew into a multimedia platform that offered a generation of creators and innovators an astonishing range of opportunities to develop and distribute new kinds of digital content. For the better part of a decade, Flash was the de facto standard for dynamic online media, empowering amateur and professional developers to shape the future of the interactive Web. In this book, Anastasia Salter and John Murray trace the evolution of Flash into one of the engines of participatory culture. Salter and Murray investigate Flash as both a fundamental force that shaped perceptions of the web and a key technology that enabled innovative interactive experiences and new forms of gaming. They examine a series of works that exemplify Flash's role in shaping the experience and expectations of web multimedia. Topics include Flash as a platform for developing animation (and the "Flashimation" aesthetic); its capacities for scripting and interactive design; games and genres enabled by the reconstruction of the browser as a games portal; forms and genres of media art that use Flash; and Flash's stance on openness and standards—including its platform-defining battle over the ability to participate in Apple's own proprietary platforms. Flash's exit from the mobile environment in 2011 led some to declare that Flash was dead. But, as Salter and Murray show, not only does Flash live, but its role as a definitive cross-platform tool continues to influence web experience.

The Two Degrees Dangerous Limit for Climate Change Jul 03 2021 This book is about the history, present and future of one the most important policy ideas of the modern era - that there is a single, global dangerous amount of climate change. That dangerous amount of climate change is imagined as two degrees centigrade of global warming above the pre-industrial average. Though the two degree idea is based on the value system of elite policy actors, it is been constructed in public discourses as scientific fact. This false representation of the concept undermines opportunities for positive public engagement with the climate policy debate, yet it is strong public engagement which is a recurring aspiration of climate policy discourses and is considered essential if climate mitigation strategies are to work. Alongside a critical analysis of how the idea of a single dangerous limit has shaped our understanding of what sort of problem climate change is, the book explains how the public have been kept out of that decision making process, the implications of this marginalisation for climate policy and why the dangerous limit idea is undermining our ability to mitigate climate change. The book concludes by exploring possibilities for a deliberation about the future of the two degree limit which allows for public participation in the decision making process. This book illustrates why, at this critical juncture in the climate policy debate, the two degree limit idea has failed to achieve any of the policy goals intended. This is the first book dedicated to questioning the issue of the two degree limit within a social science framework and should be of interest to students and scholars of environmental policy and politics, climate change communication, and science, technology and society studies.
