Empires of the Weak Sep 17 2022 What accounts for the rise of the state, the creation of the first global system, and the dominance of the West? The conventional answer asserts that superior technology, tactics, and institutions forged by Darwinian military

competition gave Europeans a decisive advantage in war over other civilizations from 1500 onward. In contrast, *Empires of the Weak* argues that Europeans actually had no general military superiority in the early modern era. J. C. Sharman shows instead that European expansion from the late fifteenth to the late eighteenth centuries is better explained by deference to strong Asian and African polities, disease in the Americas, and maritime supremacy earned by default because local land-oriented polities were largely indifferent to war and trade at sea. Europeans were overawed by the mighty Eastern empires of

the day, which pioneered key military innovations and were the greatest early modern conquerors. Against the view that the Europeans won for all time, Sharman contends that the imperialism of the late nineteenth and early twentieth centuries was a relatively transient and anomalous development in world politics that concluded with Western losses in various insurgencies. If the twenty-first century is to be dominated by non-Western powers like China, this represents a return to the norm for the modern era. Bringing a revisionist perspective to the idea that Europe ruled the world due to military dominance, *Empires of the*

Weak demonstrates that the rise of the West was an exception in the prevailing world order.

Empires of the Sea Feb 27 2021 In 1521, Suleiman the Magnificent, Muslim ruler of the Ottoman Empire, dispatched an invasion fleet to the Christian island of Rhodes. This would prove to be the opening shot in an epic clash between rival empires and faiths for control of the Mediterranean and the center of the world. In *Empires of the Sea*, acclaimed historian Roger Crowley has written a thrilling account of this brutal decades-long battle between Christendom and Islam for the soul of Europe, a fast-paced

tale of spiraling intensity that ranges from Istanbul to the Gates of Gibraltar. Crowley conjures up a wild cast of pirates, crusaders, and religious warriors struggling for supremacy and survival in a tale of slavery and galley warfare, desperate bravery and utter brutality. *Empires of the Sea* is a story of extraordinary color and incident, and provides a crucial context for our own clash of civilizations. [The Early Middle Ages](#) Oct 18 2022 "The Early Middle Ages" covers one of the darkest periods in European history—from the collapse of the Roman Empire through centuries of chaos, destruction, and barbarian rule. The

Germanic Invasions, civilizing power of the church, the rise of feudalism, and life in a medieval castle are among the topics vividly documented in this richly illustrated text. Challenging map exercises and review questions encourage meaningful reflection and historical analysis. A unit test and answer key are included. *An Unproclaimed Empire: The Grand Duchy of Lithuania* Jul 23 2020 An Unproclaimed Empire: The Grand Duchy of Lithuania is an interdisciplinary study of the Grand Duchy of Lithuania (GDL) that is historical in subject but social scientific in approach. It is also the first study to apply this comparative and social

scientific method to the GDL. In this book, Zenonas Norkus draws on national historiographies and applies theories from comparative empire studies involving historians, sociologists, political scientists, anthropologists and scholars in the theory of international relations, allowing it to transcend differences in national viewpoints. It also provides answers to contested issues in the history of the GDL, and raises a number of new questions, including whether the Grand Duchy was an empire or a federation, and why and when it failed. By adopting this "imperial approach" of considering the

GDL as an empire, this book brings something new to the research surrounding the Grand Duchy and is ideal for academics and postgraduates of early modern Lithuania, early modern Eastern Europe, historical sociology, and the history of empires.

Empires of the Sea Mar 11 2022 Empires of the Sea brings together studies of maritime empires from the Bronze Age to the Eighteenth Century. The volume develops the category of maritime empire as a specific type of empire in both European and 'non-western' history.

Call to Freedom Jan 21 2023 **The Empire Has An Answer** Jul 03 2021 'If we do not win

the battle of training, we shall win no other battle in the air.' In 1943 the Royal Air Force recognised that training a vast amount of aircrew for a high attrition war was essential to an Allied victory, and that the key to winning the 'battle of training' was the Empire Air Training Scheme (EATS). 37,576 Australian aircrew graduated from the EATS. Over 300 were killed whilst training for war and 9874 aircrew were killed or listed as missing while on active duty. Those who fought under this scheme during World War II amounted to just 6.7 per cent of Australian service personnel serving overseas yet the aircrew losses amounted to

almost 25 per cent of all the Australian fatalities during the war. This made serving in EATS among the most hazardous duties of the war. The Empire has an Answer was researched using more than 35 000 articles, from 150 metropolitan, regional, and district newspapers, and what materialised was a story of one of, if not, the greatest training programs the world has seen. Follow the journey from the conception and implementation of the scheme, through recruitment and basic training, flight training, and then into combat. The individual accounts woven into the narrative provide a first-hand experience of the triumphs and

trials of typical airmen and airwomen who performed extraordinary feats in a time of great need. The significant achievements and success of the Empire Air Training Scheme has for the most part been overlooked in our history, until now.

[Empire's Labor](#) Jan 09 2022 In a dramatic unveiling of the little-known world of contracted military logistics, Adam Moore examines the lives of the global army of laborers who support US overseas wars. Empire's Labor brings us the experience of the hundreds of

thousands of men and women who perform jobs such as truck drivers and administrative assistants at bases located in warzones in the Middle East and Africa. He highlights the changes the US military has undergone since the Vietnam War, when the ratio of contractors to uniformed personnel was roughly 1:6. In Afghanistan it has been as high as 4:1. This growth in logistics contracting represents a fundamental change in how the US fights wars, with the military now dependent on a huge pool of contractors recruited from around the world. It also, Moore demonstrates, has social, economic, and political

implications that extend well beyond the battlefields. Focusing on workers from the Philippines and Bosnia, two major sources of "third country national" (TCN) military labor, Moore explains the rise of large-scale logistics outsourcing since the end of the Cold War; describes the networks, infrastructures, and practices that span the spaces through which people, information, and goods circulate; and reveals the experiences of foreign workers, from the hidden dynamics of labor activism on bases, to the economic and social impacts these jobs have on their families and the communities they hail from. Through his

extensive fieldwork and interviews, Moore gives voice to the agency and aspirations of the many thousands of foreigners who labor for the US military. Thanks to generous funding from UCLA and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories. Extremities Dec 08 2021 In the decades following the French Revolution, four artists - Girodet, Gros, Gericault, and Delacroix - painted works in their Parisian studios that vividly expressed violent events in faraway, colonial lands. This book examines six of these paintings and argues that their disturbing, erotic depictions of slavery, revolt, plague,

decapitation, cannibalism, massacre, and abduction chart the history of France's empire and colonial politics. Darcy Grimaldo Grigsby shows that these paintings about occurrences in the West Indies, Syria, Egypt, Senegal, and Ottoman Empire Greece are preoccupied not with mastery and control but with loss, degradation, and failure, and she explains how such representations of crises in the colonies were able to answer the artists' longings as well as the needs of the government and the opposition parties at home. Empire made painters devoted to the representation of liberty and the new French nation confront liberty's

antithesis: slavery. It also forced them to contend with cultural and racial difference. Young male artists responded, says Grigsby, by translating distant crises into images of challenges to the self, making history painting the site where geographic extremities and bodily extremities articulated one another.

[The Rise and Fall of the Byzantine Empire](#) Jul 15 2022 The research objectives are to investigate the history and

theology of the Monophysite Controversy in order to help the reader understand the impact on the development of Christianity and of Islam. This will involve answering many questions. First, the research will investigate the origin and basis of the historical setting and theological arguments for the Monophysite Controversy. The key question to answer is why is it important to establish whether Christ has one nature or two natures? Second, the research will investigate the process regarding the debate. The key question to answer is how a majority position becomes orthodox and a minority position is condemned as heretical. Third, the

research will investigate the chronology of the events. The key question is when each doctrine was debated, what was the timeline for debate and resolution. Fourth, the research will investigate the persons who entered into the debate. The key question is who led the debate either for or against the Monophysite position. Fifth, the research will investigate the impact of the controversy on Christianity and Islam. The key questions will be: (1) how were Christianity and the Byzantine Empire weakened; and (2) how was early Islamic theology affected.

To do this, his chapters discuss particular topics such as prayer, biblical interpretation, worship, and persecution, as

well as prominent and controversial individuals such as Ignatius of Antioch, Justin Martyr, Melito of Sardis, and Tertullian. Part One addresses the world of the apostolic fathers, Part Two addresses hostility to Christianity and the response of Christians to this antagonism, and Part Three addresses doctrinal and communal issues of the third century. World Empires, World Missions, World Wars - Test Kit Oct 06 2021

Useful Enemies Jun 14 2022 From the fall of Constantinople in 1453 until the eighteenth century, many Western European writers viewed the Ottoman Empire with almost obsessive interest. Typically they reacted to it with fear and distrust; and such feelings were reinforced by the deep hostility of Western Christendom towards Islam. Yet there was also much curiosity about the social and political system on which the huge power of the sultans was based. In the sixteenth century,

especially, when Ottoman territorial expansion was rapid and Ottoman institutions seemed particularly robust, there was even open admiration. In this path-breaking book Noel Malcolm ranges through these vital centuries of East-West interaction, studying all the ways in which thinkers in the West interpreted the Ottoman Empire as a political phenomenon - and Islam as a political religion. *Useful Enemies* shows how the concept of 'oriental despotism' began as an attempt to turn the tables on a very positive analysis of Ottoman state power, and how, as it developed, it interacted with

Western debates about monarchy and government. Noel Malcolm also shows how a negative portrayal of Islam as a religion devised for political purposes was assimilated by radical writers, who extended the criticism to all religions, including Christianity itself. Examining the works of many famous thinkers (including Machiavelli, Bodin, and Montesquieu) and many less well-known ones, *Useful Enemies* illuminates the long-term development of Western ideas about the Ottomans, and about Islam. Noel Malcolm shows how these ideas became intertwined with internal Western debates about power, religion, society, and war.

Discussions of Islam and the Ottoman Empire were thus bound up with mainstream thinking in the West on a wide range of important topics. These Eastern enemies were not just there to be denounced. They were there to be made use of, in arguments which contributed significantly to the development of Western political thought.

(Dis)connected Empires Mar 31

2021 *(Dis)connected Empires* takes the reader on a global journey to explore the triangle formed during the sixteenth century between the Portuguese empire, the empire of Kotte in Sri Lanka, and the Catholic Monarchy of the Spanish Habsburgs. It explores nine decades of connections, cross-cultural diplomacy, and dialogue, to answer one troubling question: why, in the end, did one side decide to conquer the other? To find the answer, Biedermann explores the imperial ideas that shaped the politics of Renaissance Iberia and sixteenth-century Sri Lanka. *(Dis)connected Empires* argues that, whilst some of these ideas and the political

idioms built around them were perceived as commensurate by the various parties involved, differences also emerged early on. This prepared the ground for a new kind of conquest politics, which changed the inter-imperial game at the end of the sixteenth century. The transition from suzerainty-driven to sovereignty-fixated empire-building changed the face of Lankan and Iberian politics forever, and is of relevance to global historians at large. Through its scrutiny of diplomacy, political letter-writing, translation practices, warfare, cartography, and art, (Dis)connected Empires paints a troubling panorama of connections breeding

divergence and leading to communicational collapse. It examines a key chapter in the pre-history of British imperialism in Asia, highlighting how diplomacy and mutual understandings can, under certain conditions, produce conquest.
