Electoral Defeat and Party Change Feb 09 2022 This book examines the factors determining the character, depth, scope and outcomes of changes made by political parties in the aftermath of electoral losses. It considers not only the objective aspects of party organisation and its features and structure, in explaining post-defeat party change, but also includes findings on the perceptions and interpretations of electoral results within political parties. Based on an extensive fieldwork, the authors propose a new analytical perspective to establish whether and under what conditions and circumstances an electoral defeat leads to a profound party makeover.

**Democracy's Promise** Aug 23 2020 Given the massive demographic changes in the United States during the past few decades, understanding the place of immigrants in the public sphere has never been more critical. Democracy's Promise examines both the challenges and opportunities posed to American civic institutions by the presence of increasing numbers of immigrants. Author Janelle Wong argues that the low levels of political participation among contemporary immigrants are not due to apathy or preoccupation with their homeland, but to the inability of American political parties and advocacy organizations to mobilize immigrant voters. Wong's rich study of Chinese and Mexican immigrants in New York and Los Angeles complements traditional studies of political behavior and civic institutions while offering a nuanced examination of immigrants' political activity. Democracy's Promise will appeal to a broad spectrum of social scientists and ethnic studies scholars who study or teach immigration, racial and ethnic politics, political participation, civic engagement, and American political institutions. In addition, it will appeal to community organizers and party activists who are interested in issues of race and ethnicity, immigration, political participation, and political mobilization. Janelle Wong is Assistant Professor of Political Science and American Studies and Ethnicity at the University of Southern California. "As political parties (perhaps) decline in the United States, as civic organizations (perhaps) move away from direct participatory politics, and as the number of immigrants certainly increases--what will link new Americans to the political realm? Janelle Wong answers this important question clearly, with elegance, nuance, rich description, and galvanizing provocativeness. Her evidence is compelling and her sense of urgency about the need for parties to look beyond short-term interests even more so." --Jennifer L. Hochschild, Harvard University "Wong draws on the Latino and Asian immigrant experience, with specific examples from the Chinese and Mexican communities of New York and Los Angeles, to show how the political parties have largely failed to organize these groups and why labor unions and immigrant advocacy organizations have stepped in to take their place. Far from 'disuniting' America, she clearly shows that bringing these groups into the political fray is central to the project of renewing American democracy." --John Mollenkopf, CUNY Graduate Center "A scathing critique of the role of parties in the mobilization of new immigrants and an invaluable analysis of alternative pathways of mobilization through community organizations." --Michael Jones-Correa, Cornell University "By employing multiple empirical methods, including in-depth interviews and sophisticated survey analyses, Janelle Wong provides a compelling account of the political activities and allegiances of America's Asian and Latino immigrants that challenges much conventional wisdom. Often the political parties are failing to reach out to these groups, and often immigrants remain concerned about their home countries; but they are nonetheless increasingly active in American politics, in ways that may do much to shape the course of American political development in the 21st century. Democracy's Promise is a major contribution to our understanding of this crucial dimension of American politics." --Rogers M. Smith, University of Pennsylvania "Democracy's Promise challenges political parties to reexamine their priorities for mobilizing new voters, and identifies the critical role civic institutions play in invigorating participation among immigrant citizens. Wong's analysis is at once precise and expansive; illuminating the contours of Latino and Asian American political incorporation and provoking thoughtful debate on inclusion in democratic theory." --Jane Junn, Rutgers University

*Democracy within Parties* Jul 02 2021 Can too much participation harm democracy? Democratic theory places great importance upon the conduct of elections, but it is not often recognized that the electoral game takes place in two arenas, not only between parties but also within them. This pioneering book presents a new approach to understanding political parties. It sheds light on the inner dynamics of party politics and offers the first comprehensive analysis of one of the most important processes any party undertakes - its process of candidate selection. Candidate selection methods are the mechanisms by which a party chooses its candidates for the general elections. It may be the function that separates parties from other organizations. For such an important function, this field has certainly faced a dearth of serious investigation. Hazan and Rahat, the leading scholars on this topic, conduct an in-depth analysis of the consequences of different candidate selection methods on democracy. This book is a culmination of almost two decades of research and defines the field of candidate selection. Part I of the book delineates candidate selection methods based on four major dimensions: candidacy; the selectorate; decentralization; and voting versus appointment systems. Part II analyses the political consequences of using different candidate selection methods according to four important aspects of democracy: participation; representation; competition; and responsiveness. The book ends with a proposed candidate selection method that optimally balances all four of the democratic aspects concurrently, and answers the question 'Is the most participatory candidate selection method necessarily the best one for democracy?' Comparative Politics is a series for students, teachers, and researchers of political science that deals with contemporary government and politics. Global in scope, books in the series are characterised by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit [www.essex.ac.uk/ecpr](http://www.essex.ac.uk/ecpr) The General Editor

**Political Parties and Primaries in Kentucky** May 12 2022 This is a study of Kentucky political parties: how they are organized and how they nominate and elect candidates. Because state politics in Kentucky is dominated by the Democratic Party, a major portion of the study is devoted to the Democratic primary candidates, campaign techniques, funding, of elections, and voting patterns. As in other states, campaign techniques in Kentucky are changing. During the 1950s and 1960s the Democratic Party had two dominant factions, and candidates for statewide office sought factional allies among local party organizations. Now factional alignments have disappeared, and candidates for statewide office build campaign organizations from thousands of active party workers. The characteristics, motivations, and allegiances of these party activists form one major focus of this book. Another focus is television, which has assumed ever greater importance in statewide primary campaigns. Because it is expensive, candidates who are wealthy or can raise large sums for television advertising enter the primaries with a substantial advantage, and those who use that medium most effectively are most likely to win. Two wealthy candidates who proved to be talented campaigners in person and on television were nominated by the Democrats in 1987: Wallace Wilkinson in the gubernatorial race and Brereton Jones in the race for lieutenant governor. The book features case studies of these two campaigns, which in many ways typify modern primary elections in Kentucky. Finally, since the 1950s, the Republican Party has been highly successful in campaigns for national office in Kentucky but has been unable to elect a governor since 1967. This study provides some answers to two questions: What is wrong with the Republican Party in Kentucky? And why are so many Kentuckians voting Republican in national races and Democratic in state races?

The Forgotten Cost of Freedom Aug 15 2022 This book was born out of the deep frustration the author felt while watching the 2011 Debt Ceiling debacle play out on TV. As it took shape, the President's approval rating fell to a low 36% and the Congressional approval rating plummeted to a miserable 14%. Needless to say, the mood of the nation was, and continues to be, one of general disgust for our elected representatives and a strong desire for change. The author, Eric J. Kiser, had finally had enough. Gathering a diverse group of friends around him, he formed the political action committee (PAC) "The League of Non-Aligned Voters". This political manifesto is his attempt to tell it like it is. The message: The American public seems to have forgotten how this country should work. Voters today are unhappy with the state of our union but still believe the answers to all our problems will be found with a politician already "working" in government. And, besides all evidence to the contrary, the voting public actually believes this career politician will be able to bring about the necessary improvements and reforms. The American people obviously have no idea how to go about achieving real change. If we did, we would not place our trust in a single candidate or one political party that claims to have all the answers. Meanwhile, these political parties have managed to herd a majority of Americans into two tidy little groups -- Liberal or Conservative. Red People or Blue People. Left or Right.-- Here they try to convince us that the fault for all our problems falls squarely in the lap of the opposition. Do we really believe that one party has all the answers or, that the other party is the cause of every problem on earth? I don't think so. Could it be that each side has some ideas or platforms that are good for America and some that are bad? This seems a little more accurate. But, the most likely scenario today is that both parties' share much of the blame for the problems in our current political system and both have a vested interest in maintaining the status quo. This book has one simple goal in mind: To get more Americans thinking about how to regain control over the government again. This book suggests ways on how to do that by removing emotion from the equation and replacing it with logic, common sense and as much humor as we can muster. If we can just put away our partisanship long enough to remember a few basic concepts, then perhaps we can all come to a greater understanding of, and commitment to, the work that needs to be done, and why we better get to it before its too late. Remember; It was never supposed to be about moving the public to the "Left or Right". It's supposed to be about all of us moving "FORWARD!"

Dark Money and Political Parties After Citizens United Jan 28 2021 This dissertation, broadly, focuses on how the ability to make political donations anonymously changed American politics. Culminating the 2010 *Citizens United v. FEC* decision, the rise of nonprofit corporations as a conduit for campaign money means that a large portion of spending in American elections cannot be connected to any individual donors creating a system akin to the Australian ballot for money in politics. I explore how this change affected three facets of American politics; how donors behave when they can give anonymously, how being able to shield ones donors affects the type of candidates an interest group supports and finally how the legal green-light for nonprofits to spend in elections changed which nonprofit organizations became financially involved with each other. First, I developed a complete accounting of grants made between nonprofit organizations built from over 2 million digitized IRS forms made public in the summer of 2016 as the result of a lawsuit. My dissertation is not only the first project that examines these filings at scale, but also the first time this full network has been mapped. Using a network science algorithm that partitions the full graph into meaningful communities, I develop a theory of what I term dark parties or groups of nonprofits linked financially that make independent expenditures in Congressional elections. Next, I show that while dark money organizations form networks similar to those of traditional political parties, the types of candidates they prefer are vastly different. In a chapter of my dissertation, I show that these organizations prefer candidates farther from the ideological center and are especially active during the primary elections that traditional parties tend to eschew. Using a mixed-methods approach, I show that being able to give anonymously has important consequences not just for interest group behavior, but for donor behavior as well. I examine a list of donors that I uncovered from court filings to a nationally active dark money organization that spent on two ballot initiatives in California during the 2012 election. This list is the only publicly available list of dark money donors in circulation today and the first time such a list is studied by an academic researcher. I show that the donors to this organization, which supported two conservative positions, were much more liberal in their non-anonymous political giving than donors who gave transparently. This finding shows that the ability to obscure ones identity lets a donor behave differently than they would when their donations are subject to public scrutiny. Finally, while ample literature on the effects of disclosure exists, examinations into the motivations of why donors choose anonymity in their political giving remains unstudied. I present two survey experiments that seek to answer this question. First, I present survey results from the 2018 Cooperative Congressional Election Study that show that past giving to candidates from the opposite party that one normally supports correlates with an increased willingness to pay a premium to keep one's political giving secret. Next, turning to another survey experiment, I find that potential voters are more likely to react negatively to an actual argument by opponents of a ballot measure when they know the names of the actual donors to a dark money group that opposed it. Combined, these results indicate both a social pressure rationale for obscuring one's political giving and a strategic goal of distancing an electoral campaign from controversial donors. Taken as a whole, this research answers a broader question

related to the balance of power between political parties and interest groups. Political parties perform a myriad of functions crucial to the maintenance of government that our democracy as presently conceived would be unthinkable without them. Despite their ubiquity, however, parties are notoriously hard to define. Parties exist beyond the formal structure of party officers and official state chapters, encompassing a myriad of outside actors who while not bearing the official stamp of the organization are crucial to its mission. The balance of power between these interest groups broadly defined and the formal party organizations are dictated by a myriad of factors--such as legal limitations, resource constraints and differing electoral goals.

Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

**Matching Voters with Parties and Candidates** Mar 30 2021 Voting Advice Applications – VAAs – have become a widespread online feature of electoral campaigns in Europe, attracting growing interest from social and political scientists. But until now, there has been no systematic and reliable comparative assessment of these tools. Previously published research on VAAs has resulted almost exclusively in national case studies. This lack of an integrated framework for analysis has made research on VAAs unable to serve the scientific goal of systematic knowledge accumulation. Against this background, Matching Voters With Parties and Candidates aims first at a comprehensive overview of the VAA phenomenon in a truly comparative perspective. Featuring the biggest number of European experts on the topic ever assembled, the book answers a number of open questions and addresses debates in VAA research. It also aims to bridge the gap between VAA research and related fields of political science.

The authors evaluate their hypotheses on

legislative speechmaking by considering parliamentary debates in seven European democracies: Czech Republic, Estonia, Finland, Germany, Ireland, Norway and Sweden. Assuming that MPs are concerned with policy-making, career advancement, and re-election, the book discusses various incentives to taking the floor, and elaborates on the role of gender and psychological incentives in speechmaking. The authors test our expectations on a novel dataset that covers information on the number of speeches held by MPs and on the ideological positions MPs adopted when delivering a speech.
