For centuries, the lighthouse has stood as a beacon of guidance for mariners at sea. More than an aid to navigation, the lighthouse symbolizes safety, permanence, reliability, and the comfort of the familiar. For this reason, we have chosen to illustrate the Canadian eighth edition of Managerial Accounting by Garrison, Chesley, Carroll and Webb with an image that encapsulates the greatest strengths of this leading text. Garrison is your guide through the challenging waters of managerial accounting. It identifies the three functions managers must perform within their organizations—plan operations, control activities, and make decisions—and explains what accounting information is necessary to perform these functions, how to collect it, and how to interpret it. Managerial Accounting 8e focuses, now as in the past, on three qualities: Relevant

Balance and Clarity. The authors' steady focus on these core elements led to tremendous results! As seafarers look to the lighthouse for direction along unfamiliar shore, so too can Garrison act as a compass for students seeking to master this course. Introductory Statistics is designed for a semester, introductory statistics course and is geared toward students majoring in fields other than math or engineering. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovative art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students.
