This book explores the place of education in development debates and provides a systematic and a theoretical overview of the main approaches to the subject. It emphasizes the fact that education is profoundly shaped by national and local cultures even if many issues are shared across locations. The eighth edition of SUPPLY CHAIN MANAGEMENT: A LOGISTICS PERSPECTIVE has refined its focus on the supply chain approach, one of the latest developments in logistics management. Its strategic managerial focus blends logistics theory with practical applications and includes updated material on the latest technology, transportation regulations, pricing, and other issues. This market-leading text continues to focus on the integration of the supply chain approach as an important concept in understanding contemporary logistics management. In addition, this text focuses on changes in the way business is being done, with a particular emphasis on technology. Each chapter opens with Supply Chain Profiles, vignettes that introduce students to the chapter's topics through familiar real-world companies, people, and events. For this new edition, the majority of the profiles have been changed. Each chapter also includes new and updated On the Line boxed features, which are applied examples that provide students with hands-on managerial experience of the chapter's topics. Supply Chain Technology boxes appear throughout the text, helping students relate technological developments to supply chain management concepts and logistics practices. Short Cases at the end of each chapter are updated and build on what students have learned in the chapter. Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources Development initiated a research project to investigate more thoroughly why students dropped out, what led them to persist in higher education to graduation, and what made for a successful transition to the labour market. The chapters in this volume address these issues in relation to one or more of seven institutional case studies conducted in 2005. A must-read for all fans of the inspirational former Miss South Africa and businesswoman Basetsana Kumalo and her family. Using the ecological perspective and emphasizing human diversity, this generalist social work practice text presents the values, knowledge, and skills of intervention that are necessary when working with diverse clientele. The different areas of study focus systematically on individuals, families, groups, communities, and organizations. Skills of communication, including interviewing and relationship skills, are highlighted. The Associate Bookkeeper Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam. The never-before-told story of the friendship between Martin Luther King Jr. and Thich Nhat Hanh—icons who changed each other and the world The day after Martin Luther King Jr. was assassinated in 1968, Thich Nhat Hanh wrote a heartbroken letter to their mutual friend Raphael Gould. He said: "I did not sleep last night. . . . They killed Martin Luther King. They killed us. I am afraid the root of violence is so deep in the heart and mind and manner of this society. They killed him. They killed my hope. I do not know what to say. . . . He made so great an impression in me. This morning I have the impression that I cannot bear the loss." Only a few years earlier, Thich Nhat Hanh wrote an open letter to Martin Luther King Jr. as part of his effort to raise awareness and bring peace in Vietnam. There was an unexpected outcome of Nhat Hanh's letter to King: The two men met in 1966 and 1967 and became not only allies in the peace movement, but friends. This friendship between two prophetic figures from different religions and cultures, from countries at war with one another, reached a great depth in a short period of time. Dr. King nominated Thich Nhat Hanh for the Nobel Peace Prize in 1967. He wrote: "Thich Nhat Hanh is a holy man, for he is humble and devout. He is a scholar of immense intellectual capacity. His ideas for peace, if applied, would build a monument to ecumenism, to world brotherhood, to humanity." The two men bonded over a vision of the Beloved Community: a vision described recently by Congressman John Lewis as "a nation and world society at peace with itself." It was a concept each knew of because of their membership within the Fellowship of Reconciliation, an international peace organization, and that Martin Luther King Jr. had been popularizing through his work for some time. Thich Nhat Hanh, Andrus shows, took the lineage of the Beloved Community from King and carried it on after his death. In Brothers in the Beloved Community, Marc Andrus tells the little-known story of a friendship between two giants of our time. Robert Greene's The 48 Laws of Power has shaken up the lives of millions. It's wielded by successful business executives, leading actors and musicians, and even by criminal kingpins. But how can you apply its lessons to your life? Perhaps you want to become a modern Machiavelli. Perhaps you want to escape the daily grind and realise your true potential and your dreams. Or maybe you're just tired of finding yourself the victim of other people's games. But with 48 Laws to choose from and a strong possibility that any one of them might seem like a radical overhaul of your habits and thought processes, it can seem overwhelming or impossible to put the Laws into practice. Help is at hand. Drawing on our major podcast series, Exploring The 48 Laws of Power, this book provides all you need to put the Laws into practice and make lasting changes to your life. We reveal the 3 Most Powerful Laws (the ones you should start with, and on which all the others build) and the 4 Indispensable Power Principles (the specific rules of thumb and social 'hacks' which explain how the Laws really work in the world today). Armed with this knowledge, The 48 Laws of Power won't be a cool book you glanced through and then shelved. It will change your life. Thou Shalt Not Be Horrible. Imagine for a moment what the world might look like if we as people of faith, morality, and conscience actually aspired to this mantra. What if we were fully burdened to create a world that was more loving and equitable than when we arrived? What if we invited one another to share in wide-open, fearless, spiritual communities truly marked by compassion and interdependence? What if we daily challenged ourselves to live a faith that simply made us better humans? John Pavlovitz explores how we can embody this kinder kind of spirituality where we humbly examine our belief system to understand how it might compel us to act in less-than-loving ways toward others. This simple phrase, "Thou Shalt Not Be Horrible," could help us practice what we preach by creating a world where: spiritual community provides a sense of belonging where all people are received as we are; the most important question we ask of a religious belief is not Is it true? but rather, is it helpful? it is morally impossible to pledge complete allegiance to both Jesus and America simultaneously; the way we treat others is the most tangible and meaningful expression of our belief system. In If God Is Love, Don't Be a Jerk, John Pavlovitz examines the bedrock ideas of our religion: the existence of hell, the utility of prayer, the value of anger, and other doctrines to help all of us take a good, honest look at how the beliefs we hold can shape our relationships with God and our fellow humans—and to make sure that love has the last, loudest word. Local Computer Network Technologies covers the considerable amount of work accomplished in developing link access protocols for ring and bus computer-communication networks. This three-chapter book systematically discusses both of these protocols and their associated performance models. Chapter 1 surveys the performance models of local computer networks that make use of either ring or bus technology to connect the nodes. Chapter 2 characterizes a ring network as a collection of processing elements that are interconnected through a communications path in the form of a loop. This chapter also discusses the three basic loop access protocols: the Pierce and Newhall loops, and the distributed loop computer network. Chapter 3 deals with the possible communications systems for a network of computers. This chapter also examines the advantages and disadvantages of a bus network over other network types. This book will be of value to computer and communications engineers and designers. Bring the excitement of rugby right to your desktop with this fun miniature set.
