*The Robbie Burns Revival & Other Stories Jun 02 2021 These linked short stories tell the tales of Tony Aardehuis, a young Ontario police officer who centres more on the human puzzle than on crime and detection. Fraud, theft, blackmail: every small town crime short of murder drives these stories to conclusions that usually warm the heart. Along the way Tony struggles, like*

the rest of us, to figure it all out. The first Tony Aardehuis story was inspired by the Eastern Ontario ice storm of 1998 and the suggestion that natural disaster might double as a murder weapon. This constable meets life with a fine blend of curiosity, compassion and an occasional bent for bending the rules. Tony Aardehuis's adventures have been published in *The Grist Mill*, *Bone Dance*, and *Storyteller Magazine*, where he twice won *The Great Canadian Story Contest*. One story is also shortlisted for a 2003 *Arthur Ellis Award*.

*Theory of Ground Vehicles* Feb 22 2023 **THEORY OF GROUND VEHICLES**  
A leading and authoritative text for advancing ground vehicle mobility *Theory of Ground Vehicles, Fifth Edition* presents updated and expanded coverage of the critical factors affecting the performance, handling, and ride essential to the development and design of road and off-road vehicles. Replacing internal combustion engines with zero-emission powerplants in ground vehicles to eliminate greenhouse gas emissions for curbing climate change has received worldwide attention by both the vehicle industry and governmental agencies. To enhance safety, traffic flow, and operating efficiency of road transport, automated driving systems have been under active development. With growing interest in the exploration of the Moon, Mars, and beyond, research in terramechanics for guiding the development of extraterrestrial rovers has been intensified. In this new edition, these and other topics of interest in the field of ground vehicle technology are explored, and technical data are updated. New features of this edition include: Expanded coverage of the fundamentals of electric drives, hybrid electric drives, and fuel cell technology Introduction to the classification and operating principles of the automated driving system and cooperative driving automation Applications of terramechanics to guiding the development of extraterrestrial rovers Elaboration on the approach to achieving the optimal operating efficiency of all-wheel drive off-road vehicles Introduction to updated ISO Standards for evaluating vehicle ride An updated and comprehensive text and reference for both the educational and

professional communities, *Theory of Ground Vehicles, Fifth Edition* will prove invaluable to aspiring and practicing engineers seeking to solve real-world road and off-road vehicle mobility problems.

*American Wheels, Chinese Roads* Sep 24 2020 How could one company—General Motors—meet disaster on one continent and achieve explosive growth on another at the very same time? While General Motors was hurtling towards bankruptcy in 2009, GM's subsidiary in China was setting new sales and profit records. This book reveals how extraordinary people, remarkable decisions and surprising breaks made triumph in China possible for General Motors. It also shows just how vulnerable that winning track record remains. No small part of GM's success in China springs from its management of shifting business and political relationships. In China, the government makes the rules for—and competes in—the auto industry. GM's business partner, the City of Shanghai, is both an ally and a competitor. How does such an unnatural relationship work on a day-to-day basis? Where will it go on the future? General Motors also engages in constant battles with other global and Chinese car makers for the hearts of demanding Chinese consumers. Dunne gives us rare glimpses into the mindsets and behavior of this new moneyed set, the world's newest class of wealthy consumers. China is already the number one car market in the world. During the next ten years, China will export millions of cars and trucks globally, including to the United States. *American Wheels, Chinese Roads* presents readers with fascinating illustrations of what to expect when Chinese cars, companies, and business people arrive on our shores.

*Evil Master* Dec 28 2020 Duan Hong, a man with a demonic personality, was sent to the temple to practice martial arts. The Violent Spirit hidden in his blood allowed him to burst forth with unparalleled strength. As the saying goes, "color is emptiness," "void is color." The Buddha sat inside, and the wine and sex passed through his intestines. When he returned to the city, he still found it difficult to change his devilish nature. Dual-faced beautiful mature woman, the beautiful mature woman, the beautiful Barbarian Queen Sister walked around him, and a pair of pure and innocent sisters were by his side as well. He, who was surrounded by red powder, how would he perform his devilish life ...

Howard Pixton Apr 12 2022 This book is a truly remarkable account that captures the atmosphere, thrills and danger of the pioneering days of aviation. Howard Pixton was flying for A V Roe at Brooklands in 1910 when S F Cody at Laffan's Plain tried to persuade him to join him. But in 1911 he test flew A V Roe's 'tractor biplane, the forerunner of the 504. By now acknowledged as the first professional test pilot, he left A V to join Bristols and for two years demonstrated new models to dignitaries across Europe. In 1913 he joined Tommy Sopwith and in 1914 he became the first Briton in a British plane to win an international race, the coveted Schneider Trophy. This gave Britain air supremacy and Howard was feted as the finest pilot in the World. Sopwith's Tabloid aircraft developed into the

'Pup', and then into the 'Camel'. Throughout The Great War Pixton test flew many of the rapid evolving designs. For a biography of an early aviation pioneer of the top rank, this book cannot be bettered.

Driveline Systems of Ground Vehicles Jan 21 2023 "With this book, Prof. Dr. Vantsevich brings a tremendous contribution to the field of Automotive Transmission and Driveline Engineering, including his innovative methods for optimum driveline synthesis, as well as his experience with the development of various hardware solutions, from the basic limited slip differentials to the most sophisticated mechatronic systems."  
-Dr.-Ing. Mircea Gradu Director, Transmission and Driveline Engineering Head, Virtual Analysis Tools Chrysler Group LLC Now that vehicles with four and more driving wheels are firmly ensconced in the consumer market, they must provide energy/fuel-saving benefits and improved operational quality including terrain mobility, traction and velocity properties, turnability, and stability of motion. A first-of-its-kind resource, Driveline Systems of Ground Vehicles: Theory and Design presents a comprehensive and analytical treatment of driveline research, design, and tests based on energy efficiency, vehicle dynamics, and operational properties requirements. This volume addresses fundamental engineering problems including how to investigate the effect of different driveline systems on the properties of vehicles and how to determine the optimal characteristics of the driveline system and its power-dividing units (PDUs) and design it for a specific vehicle to ensure high level of vehicle dynamics, energy efficiency, and performance. The authors develop an analytical apparatus for math modeling of driveline systems that can be compiled from different types of PDUs. They also introduce methodologies for the synthesis of optimal characteristics of PDUs for different types of vehicles. Structured to be useful to engineers of all levels of experience, university professors and graduate students, the book is based on the R&D projects conducted by the authors. It explores intriguing engineering dilemmas such as how to achieve higher energy and fuel efficiency by driving either all the wheels or not all the wheels, solve oversteering issues by managing wheel power distribution, and many other technical problems.
