Medical Surgical Nursing Care Mar 26 2020 Medical Surgical Nursing Care 3e has an even stronger focus on the professional Practical nursing program and is a key component in the LPN/LVN series at Pearson. It has a clear and readable writing style, it provides a strong foundation for understanding common disorders that affect adults. Opening units of the book focus on concepts, issues, and foundational knowledge. The units that follow focus on common diseases and disorders organized by body system. Each unit begins with review of the system's structure and function, nursing assessment, and commonly used diagnostic tests for disorders of that system. To facilitate learning, disorder-specific content follows a consistent pattern, beginning with discussion about the disorder, its risk factors, causes, effects on the body, manifestations, and possible complications. Because nurses are integral members of the healthcare team, interdisciplinary care sections include nursing implications for medications, nutritional therapies, surgery and other treatments, including complementary therapies. Each disorder concludes with nursing care, including priorities of care, health promotion, assessment, nursing care measures, and a section addressing continuity of care to home or the community. This text provides more depth in common disease processes, their treatment, and related nursing care. Although organized by body systems for clarity, the book retains a nursing focus throughout. Rationales are provided for nursing interventions to help the student understand the why, not just the what.

Critical Care Plans Dec 23 2019 This care plan book serves as a guide for nurses who plan and promote health care for the critically ill patient. With the trends in health care of cost containment and shortened stays, patients in critical care units have higher acuity levels and stay for much shorter times than in the past. The average critical care nurse is forced to spend so much of the time coping with the technical aspects of the patient's care that the planning aspects

tend to get shuffled to the background. The primary focus of this book is planning for holistic care in a setting where these life threatening conditions are the primary concern.

In-depth patient teaching content, with each disorder care plan, concluding with a Deficient Knowledge diagnosis with extensive discharge teaching information, serves as a guideline for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this growing population group. Nursing and collaborative diagnoses are linked to actions and rationales. Animations, additional care plans, and skills videos on Evolve offer additional help in care planning. Body system organization makes content easy to locate. NEW and UNIQUE! A completely new chapter on nursing-sensitive indicators features care plans devoted to measures and indicators that reflect the structure, processes and outcomes of nursing care (American Nurses Association, 2004), as well as financial implications for healthcare organizations. NEW! The most recent NANDA-I(R) nursing diagnoses, NIC(R) interventions, and NOC(R) outcomes reflect the most up-to-date nursing taxonomies. NEW! Updated content throughout reflects the latest evidence-treatment protocols and national and international guidelines.
