Maximum PC is the magazine that every computer fanatic, PC gamer or content creator must read. Each and every issue is packed with punishing product reviews, insightful and innovative how-to stories and the illuminating technical articles that enthusiasts crave. This book considers logical proof systems from the point of view of their space complexity. After an introduction to propositional proof complexity the author structures the book into three main parts. Part I contains two chapters on resolution, one containing results already known in the literature before this work and one focused on space in resolution, and the author then moves on to polynomial calculus and its space complexity with a focus on the combinatorial technique to prove monomial space lower bounds. The first chapter in Part II addresses the proof complexity and space complexity of the pigeon

principles. Then there is an interlude on a new type of game, defined on bipartite graphs, essentially independent from the rest of the book, collecting some results on graph theory. Finally Part III analyzes the size of resolution proofs in connection with the Strong Exponential Time Hypothesis (SETH) in complexity theory. The book is appropriate for researchers in theoretical computer science, in particular computational complexity.

Make workplace conflict resolution a game that EVERYBODY wins! Recent studies show that typical managers devote more than a quarter of their time to resolving coworker disputes. The Big Book of Conflict-Resolution Games offers a wealth of activities and exercises for groups of any size that let you manage your business (instead of managing personalities). Part of the acclaimed, bestselling Big Books series, this guide offers step-by-step directions and customizable tools that empower you to heal rifts arising from ineffective communication, cultural/personality clashes, and other specific problem areas—before they affect your organization's bottom line. Let The Big Book of Conflict-Resolution Games help you to: Build trust Foster morale Improve processes Overcome diversity issues And more Dozens of physical and verbal activities help create a safe environment for teams to explore several common forms of conflict—and their resolution. Inexpensive, easy-to-implement, and proved effective at Fortune 500 corporations and mom-and-pop businesses alike, the exercises in The Big Book of Conflict-Resolution Games delivers everything you need to make your workplace more efficient, effective, and engaged.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

Open data and policy implications coming from data-aware planning entail collection and pre- and postprocessing as operations of primary interest. Before these steps, making data available to people and their decision-makers is a crucial point. Referring to the relationship between data and energy, public administrations, governments, and research bodies are promoting the construction of reliable and robust datasets to pursue policies coherent with the Sustainable Development Goals, as well as to allow citizens to make informed choices. Energy engineers and planners must provide the simplest and most robust tools to collect, process, and analyze data in order to offer solid data-based evidence for future projections in building, district, and regional systems planning. This Special Issue aims at providing the state-of-the-art on open-energy data analytics; its availability in the different contexts, i.e., country peculiarities; and its availability at different scales, i.e., building, district, and regional for data-aware planning and policy-making. For all the aforementioned reasons, we encourage researchers to share their original works on the field of open data and energy analytics. Topics of primary interest include but are not limited to the following: 1. Open data and energy sustainability; 2. Open data science and energy planning; 3. Open science and open governance for sustainable development goals; 4. Key performance indicators of data-aware energy modelling, planning, and policy; 5. Energy, water, and sustainability database for building, district, and regional systems; 6. Best practices and case studies. This step-by-step, highly visual text provides a comprehensive introduction

to managing and maintaining computer hardware and software. Written by best-selling author and educator Jean Andrews, *A+ Guide to IT Technical Support, 9th Edition* closely integrates the CompTIA+ Exam objectives to prepare you for the 220-901 and 220-902 certification exams. The new Ninth Edition also features extensive updates to reflect current technology, techniques, and industry standards in the dynamic, fast-paced field of PC repair and information technology. Each chapter covers both core concepts and advanced topics, organizing material to facilitate practical application and encourage you to learn by doing. The new edition features more coverage of updated hardware, security, virtualization, new coverage of cloud computing, Linux and Mac OS, and increased emphasis on mobile devices. Supported by a wide range of supplemental resources to enhance learning with Lab Manuals, CourseNotes online labs and the optional MindTap that includes online labs, certification test prep and interactive exercises and activities, this proven text offers students an ideal way to prepare for success as a professional IT support technician and administrator. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book lays the foundations of the theory of fluctuating multivalued fields with numerous applications. Most prominent among these are phenomena dominated by the statistical mechanics of line-like objects, such as the phase transitions in superfluids and superconductors as well as the melting process of crystals, and the electromagnetic potential as a multivalued field that can produce a condensate of magnetic monopoles. In addition, multivalued mappings play a crucial role in deriving the physical laws of matter coupled to gauge fields and gravity with torsion from the laws of free matter. Through careful analysis of each of these applications, the book thus provides students and researchers with supplementary reading material for graduate courses on phase transitions, quantum field theory, gravitational physics, and differential geometry.

Twenty-eight marked the 40th anniversary of China's reform and opening-up policy. Profound changes have been seen internally and externally, prior to 2018, during 2018, and continuing beyond 2018, which echo China's great quest for reform and engaging with the world, and shape the future of the dispute resolution industry in China. "Economic stability", "economic restructuring and upgrading", and "Sino-US trade friction" are clues to internal and external changes in 2018. Reviewing changing conditions in dispute resolution across a wide range of industries, the authors of *Commercial Dispute Resolution in China: An Annual Review and Preview (2019)* [hereinafter referred to as the "An Annual Review and Preview (2019)"] preview challenges that are yet to come. In *Annual Review on Real Estate Dispute Resolution in China (2019)*, for example, the authors present a case study on the Linkage of the First and Second Level Projects and preview potential disputes of Securitization of real estate. In *Annual Review on Investment Dispute Resolution in China (2019)*, the authors describe the arrangement of fixed income and equity repurchase under the backdrop of a slowing economy. In *Annual Review on Energy Dispute Resolution in China (2019)*, the author focuses on policies and cases relating to Chinese transnational M&As, illustrating opportunities and challenges for future "Going Global" transactions in the energy sector. In *Annual Review on International Trade Dispute Resolution in China (2019)*, the authors analyze the challenges posed by the China-US Trade War, and call for better compliance,

industrial upgrading, and better understanding of the legal environment and trade protection measures in different jurisdictions in the process of “Going Global.” Decentralization and a continuing opening-up of China’s markets are also key in understanding economic and international changes. In *Annual Review on Construction Dispute Resolution in China (2019)*, the authors introduce two examples, namely the promulgation of the Interpretation II on Issues Concerning the Application of Law for the Trial of Cases of Dispute over Construction Contracts by the Supreme People’s Court, and cancellation of construction contract record-filing by the Ministry of Housing and Urban-Rural Development, which reflect the ongoing transformation of social governance and the reforms of “delegate power, improve regulation and optimize services” (“DIO” reform) in the construction sector. In *Annual Review on Financial Dispute Resolution in China (2019)*, the author describes the opening of the futures market, clearly demonstrating the Chinese government’s determination to open financial and capital markets. In *Annual Review on Film and Television Dispute Resolution in China (2019)*, the authors investigate the phenomenon of black and white contracts and tax evasion in the field and analyze the governing regulations, especially those relating to unreasonable remuneration and unregulated online information. The question, then, would be how these regulations and administrative supervision affect dispute resolution. In *Annual Review on Civil Aviation Dispute Resolution in China (2019)*, the authors review the management of Unmanned Aerial Vehicles and the reform of low-altitude airspace management, stating that new technology often encourages good regulations. Internal and external changes also require further development of the Chinese dispute resolution industry. In *Annual Review on Commercial Arbitration in China (2019)*, new developments of practice such as non-party challenge to non-enforcement of arbitral awards, unexpected birth and end of “pre-dispute arbitration”, and the establishment of China’s International Commercial Court have been included and demonstrate a maturing environment for arbitration. The “Fengqiao Experience in the New Era”, participation in drafting the United Nations Convention on International Settlement Agreements Resulting from Mediation, and perfecting the relationship between mediation and arbitration are examples in *Annual Review on Commercial Mediation in China (2019)*, which draw attention to the blending of eastern and western types of mediation in China. Trial reform in intellectual property cases regarding “single color trademark”, “sound trademark”, and transnational disputes over Chinese intellectual property protections, are included in *Annual Review on Intellectual Property Dispute Resolution in China (2019)*, which display the innovative moves and progress of China’s judicial system. The Beijing Arbitration Commission/Beijing International Arbitration Center (hereinafter referred to as “BAC”) endeavors to present a comprehensive picture of Chinese commercial dispute resolution throughout this book. *An Annual Review and Preview (2019)* delivers 11 articles in specific fields: commercial arbitration, commercial mediation, construction, real estate, energy, international trade, investment, finance, intellectual property, film and television, and civil aviation. Each article includes an overview, major update of laws and regulations and normative documents, case studies, practical and academic focus, and conclusion and preview. In this way, we look back at 2018 and look ahead. In 2019, the related Annual Summit based on *An Annual Review and Preview (2019)* will address

dispute resolution communities in Toronto, New York, and San Francisco, as well as those in Hong Kong, Singapore, and Kuala Lumpur. With these steps, the BAC will keep practitioners in China and abroad connected, sharing knowledge of Chinese commercial dispute resolution, fostering better and faster development of Chinese dispute resolution, and making a fruitful contribution to the international dispute resolution community. At the same time, we look for the readers to share their expertise in future editions of An Annual Review and Preview. Working cooperatively, we can expect more advancements in Chinese dispute resolution. Includes extra sessions. Includes extra sessions. At the heart of this important new book is the tension between literacy and the open acknowledgement of discrepancies within social and linguistic fields on the one hand, and what Sussman terms the resolving function, the utopian picture of harmony depicted by the state and large organizations, on the other. After discussing some examples of the resolving function--Barthes's notion of the myth, Kundera's fictional treatment of kitsch, and contemporary television--Sussman draws on a line of theoretical inquiry extending from Saussure to Derrida in order to put forth a differential model of literacy in which the skills necessary to participate productively in culture are more disjunctive than associative in nature. Awareness of the discrepancies set into play by language is necessary, he argues, for both the individual and the society to understand the complex and sometimes contradictory web of socioeconomic, political, and semiological relations in which they are involved. Combining literary theory with close textual readings of works by Hawthorne, Melville, Wallace Stevens, Ezra Pound, William Carlos Williams, and Italo Calvino, this book is the first to explore the socio-political correlates to literary studies--the mass media's ambivalence toward the linguistic apprehensions and skills that make them possible.
