The Enjoyment of Music: Essential Listening Edition expands the available formats of the most trusted introduction to music with a new, brief, focused, and highly accessible textbook. Flexible and integrated, with everything students need to become active listeners. With a lifetime of experience, profound knowledge and understanding, and heartwarming appreciation, an internationally celebrated conductor and teacher answers the questions: Why should I listen to classical music? How can I get the most from the listening experience? A protégé of Leonard Bernstein--his colleague for eighteen years--and an eminent conductor who has toured and recorded all over the world, John Mauceri helps us to reap the joys and pleasures classical music has to offer. Briefly, we learn the way a musical tradition born in ancient Greece, embraced by the Roman Empire, and subsequently nurtured by influences from across the globe, gave shape to the classical music that came to be embraced by cultures from Japan to Bolivia. Then Mauceri examines the music itself, helping us understand what it is we hear when we listen to classical music: how, by a kind of sonic metaphor, it expresses the deepest recesses of human feeling and emotion; how each piece bears the traces of its history; how the concert experience--a unique one each and every time--allows us to discover music anew. Unpretentious, graceful, instructive, this is a book for the aficionado, the novice, and anyone looking to have the love of music fired within them. An optional disc includes MP3 files of all works in both Full and Shorter Editions, in addition to iLGs of works covered in the Shorter Edition. Students using the Shorter Edition will appreciate the supplemental recordings from the complete edition for comparative listening and additional assignments Setting the Standard. Raising the Bar. with NEW coverage of performance and musical style. NEW tools help students share their deepening listening skills and appreciation in writing and conversation. In this groundbreaking union of art and science, rocker-turned-neuroscientist Daniel J. Levitin explores the connection between music—its performance, its composition, how we listen to it, why we enjoy it—and the human brain. Taking on prominent thinkers who argue that music is nothing more than an evolutionary accident, Levitin poses that music is fundamental to our species, perhaps even more so than language. Drawing on the latest research and on musical examples ranging from Mozart to Duke Ellington to Van Halen, he reveals:

- How composers produce some of the most pleasurable effects of listening to music by exploiting the way our brains make sense of the world
- Why we are so emotionally attached to the music we listened to as teenagers, whether it was Fleetwood Mac, U2, or Dr. Dre
- That practice, rather than talent, is the driving force behind musical expertise
- How those insidious little jingles (called earworms) get stuck in our head
