This book is the result of a research project designed and carried out at the Department of Architecture, University of Florence. This research was based on the transfer of knowledge from members of the Albanian Diaspora in Italy (university students, young architects and researchers) to their home country. This unique process blazed a trail in the Albania-related studies by creating a methodology, which could be replicated not only in Albanian rural contexts, but also elsewhere. The book constitutes a structured tool for generating sustainable and socially inclusive territorial development processes in five lesser-known Albanian cultural sites. Their tangible and intangible cultural heritage was seen as a driving factor for triggering development processes aimed at improving the inhabitants ' quality of life and strengthening local identity and social networks. Through concrete proposals and strategies, the book offers scenarios

and solutions capable of enhancing the potential of each village and, at the same time, counteracting the effects of land abandonment that so often characterise them. Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

Created over the course of three years in a small town in the foothills of the Sierra Nevada Mountains of California, *Pine Flat* is Sharon Lockhart's first project to center on a community in the United States. Working without a film crew so that she could better immerse herself in the life of the town, Lockhart has created a formally concise yet intimate view of contemporary rural life that focuses on the interactions of the community's children, who engage in everyday activities in stunningly beautiful natural landscapes. The book - conceived as a companion work to the film, sound, and photographic components that comprise the project - includes stills and a series of nineteen large-format portraits inspired in part by the 19th-century American tradition of the portrait photographer. Although personal, these images transcend individual specificity to approach the status of archetypes, evoking a wide range of art historical references, from Edouard Manet to August Sander. *Cleo* discovers the full moon turns her into a siren with a beautiful singing voice. *Never Far Away* is a short story and resource for the parent who has a child that doesn't like to separate from them when time for school or work. It has illustrative pictures and content for the parent and child to interact before they go about their day. CD-ROM contains full text for all the procedures available in the manual. Files are provided both as fully formatted Word 6.0 (.doc) documents and as text-only documents (.txt). A collection of essays by leading historians of early modern Europe and the U.S., this book explores how merchants, entrepreneurs, and other early modern capitalists viewed themselves.

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest. In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq. This book focuses on novel design and systems engineering approaches, including theories and best practices, for promoting a better integration of people and engineering systems. It covers a range of innovative topics related to: development of human-centered systems; interface design and human-computer interaction; usability and user experience; innovative materials in design and manufacturing; biomechanics and physical rehabilitation, as well as safety engineering and systems complexity. The book, which gathers selected papers presented at the 3rd International Conference on Human Systems Engineering and Design: Future Trends and Applications (IHSED 2020), held on September 22-24, 2020, at Juraj Dobrila University of Pula, in Pula, Croatia, provides researchers and practitioners with a snapshot of the state-of-the-art and current challenges in the field of human systems engineering and design.

resourceful TV hero. Includes illustrations! For over thirty years, the name MacGyver has been synonymous with astonishing feats of ingenuity, from fixing a car with nothing but water and egg whites to busting out of jail using a hairpin and a pair of repurposed handcuffs to, of course, saving the world with his favorite weapon, a simple paperclip. What you might not know is that every trick that the resourceful secret agent pulls off on CBS ' s hit show has been tested and fact-checked by experts, and really works . . . most of the time. No one is saying that you should craft a DIY airplane out of trash bags and a lawnmower engine. But with this book, you could. The first official how-to guide to the MacGyver universe, this book is packed with drawings and step-by-step descriptions of the hacks that made this character the world ' s most resourceful secret agent. It ' s lots of fun for fans of the new hit series as well as the classic show that started it all—or anyone who enjoys a bit of applied physics and clever problem-solving. Growing up in Sea Bright, New Jersey, on the shores of the Atlantic Ocean, Gregory Martinez became engrossed with living by the sea. One day, he received a very distinguished letter addressed to him from the President of the United States. The Selective Service Department of the United States, had directed him to serve in the Armed Forces and report for active duty on July 14, 1970. Seeking guidance from his father, he was told "Go join the Navy. Do what you have to; get something positive out of the experience. Learn all you can." This became Greg's first mission. On April 16, 1971, Greg reported aboard the 4.4 acre aircraft carrier, USS Constellation (CVA-64). By September 1971, the ship and her crew, including the air wing, were combat-ready for deployment. Interspersed with combat duties, Greg experienced riveting life adventures both onboard and ashore during his years with Connie. After his Honorable Discharge, Greg began to feel the "calling" of his ship. Unsure what to make of these feelings, he slowly permitted himself to be drawn in by her. It eventually became clear that Greg needed to learn more about Connie and what was occurring during her tenure at sea. Connie—a ship that cannot and will not be forgotten—had a profound and lasting effect on Greg and others who have sailed aboard her. Greg's final mission and its results are revealed in the concluding chapters of the book; a mission which no one, not even Greg himself, could have ever predicted. This collection of essays surveys some of the artistic productions by female figures who stood at the forefront of Italian modernity in the fields of literature, photography, and even the theatre, in order to explore how artistic engagement in women informed their views on, and reactions to the challenges of a changing society and a ' disinhibiting ' intellectual landscape. However, one other objective takes on a central role in this volume: that of opening a window on the re-definition of the subjectivity of the self that occurred during an intriguing and still not fully studied period of artistic and societal changes. In particular, the present volume aims to define a female Italian Modernism which can be seen as complementary, and not necessarily in opposition, to its male counterpart.
