2021 Several internal and external factors have been
identified to estimate and control the psycho-
biological stress of training in order to optimize
training responses and to avoid fatigue,
overtraining and other undesirable health effects of
an athlete. An increasing number of lightweight
sensor-based wearable technologies ("wearables")
have entered the sports technology market. Non-
invasive sensor-based wearable technologies could
transmit physical, physiological and biological data
to computing platform and may provide through human-
machine interaction (smart watch, smartphone,
tablet) bio-feedback of various parameters for
training load management and health. However, in
theory, several wearable technologies may assist to*

control training load but the assessment of accuracy, reliability, validity, usability and practical relevance of new upcoming technologies for the management of training load is paramount for optimal adaptation and health.

Tubular Structures XI Apr 10 2022 This topical book contains the latest scientific and engineering developments in the field of tubular steel structures, as presented at the "11th International Symposium and IIW International Conference on Tubular Structures". The International Symposium on Tubular Structures (ISTS) has a long-standing reputation for being the principal showcase for manufactured tubing and the prime international forum for discussion of research, developments and applications in this field. Various key and emerging subjects in the field of hollow structural sections are covered, such as: novel applications and case studies, static and fatigue behaviour of connections/joints, concrete-filled and composite tubular members, earthquake resistance, specification and code developments, material properties and structural reliability, impact resistance and brittle fracture, fire resistance, casting and fabrication innovations. Research and

development issues presented in this book are applicable to buildings, bridges, offshore structures, entertainment rides, cranes, towers and various mechanical and agricultural equipment. This book is thus a pertinent reference source for architects, civil and mechanical engineers, designers, steel fabricators and contractors, manufacturers of hollow sections or related construction products, trade associations involved with tubing, owners or developers of tubular structures, steel specification committees, academics and research students. The conference presentations herein include two keynote lectures (the International Institute of Welding Houdremont Lecture and the ISTS Kurobane Lecture), plus finalists in the CIDECT Student Papers Competition. The 11th International Symposium and IIW International Conference on Tubular Structures – ISTS11 – took place in Québec City, Canada from August 31 to September 2, 2006.

Artificial Intelligence Methods For Software Engineering Feb 20 2023 Software is an integral part of our lives today. Modern software systems are highly complex and often pose new challenges in different aspects of Software Engineering (SE). Artificial Intelligence (AI) is a growing field in computer science that has been proven effective in applying and developing AI techniques to address various SE challenges. This unique compendium covers applications of state-of-the-art AI techniques to the key areas of SE (design, development, debugging, testing, etc). All the materials presented are up-to-date. This reference text will benefit researchers, academics, professionals, and postgraduate students

in AI, machine learning and software engineering. [Related Link\(s\)](#)

Sleep Medicine Pearls E-Book Nov 12 2019 Sleep Medicine is a rapidly growing and changing field. Experienced sleep medicine clinicians and educators Richard B. Berry, MD and Mary H. Wagner, MD present the completely revised, third edition of Sleep Medicine Pearls featuring 150 cases that review key elements in the evaluation and management of a wide variety of sleep disorders. The cases are preceded by short fundamentals chapters that present enough basic information so that a physician new to sleep medicine can start reading page 1 and quickly learn the essential information needed to care for patients with sleep disorders. A concise, practical format makes this an ideal resource for sleep medicine physicians in active practice, sleep fellows learning sleep medicine, and physicians studying for the sleep boards. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Zero in on the practical, "case-based" information you need to effectively interpret sleep studies (polysomnography, home sleep testing, multiple sleep latency testing), sleep logs, and actigraphy. Get clear, visual guidance with numerous figures and sleep tracings illustrating important concepts that teach the reader how to recognize important patterns needed to diagnose sleep disorders. Confer on the go with short, templated chapters—ideal for use by busy physicians. A combination of brief didactic material followed by case-based examples illustrates major points. Stay current with knowledge about the latest developments in sleep medicine by reading updated

chapters using the new diagnostic criteria of the recently published International Classification of Sleep Disorder, 3rd Edition and sleep staging and respiratory event scoring using updated versions of the scoring manual of the American Academy of Sleep Medicine Manual for the Scoring of Sleep and Associated Events. Benefit from Drs. Berry and Wagner's 25+ years of clinical experience providing care for patients with sleep disorders and educational expertise from presenting lectures at local, regional and national sleep medicine courses. Dr Berry was awarded the AASM Excellence in Education Award in 2010.
