Jaguar XK DIY May 29 2020 The Jaguar XK 120 was stunning when it debuted in 1948. It sold like wildfire to top film stars, and was ruthless as a rally machine -- two facts that remain true today. An XK 120, 140, or 150 in perfect condition could easily run up a six-figure price tag; if you have the know-how, why not buy a forgotten model and restore it at home? Jaguar XK DIY follows the story of author Bob Exelby as he transforms his XK 120 roadster from a rusty derelict to a shining example of the iconic sports car. Not only does this book cover how to restore the car, Exelby also explains how he made many detail improvements, making the car even more usable and practical for today's roads.

Star Wars: Rebel Starfighters Oct 03 2020 After the Clone Wars, the Galactic Empire spared no expense to build a massive fleet of warships to enforce Imperial rule, intimidate defenseless worlds, and destroy all opposition. However, the Imperial Navy underestimated Rebel Alliance fighter pilots, who flew X-wing, Y-wing, A-wing, U-wing and B-wing starfighters, and whatever else they could obtain to fight their Imperial enemies. Decades later, Resistance pilots would fly next-generation versions of Rebel starfighters against the First Order. The Rebel Starfighters Owners' Workshop Manual presents a thorough history of the starfighters that served the Rebel Alliance and the Resistance. The history includes design origins, production, and modifications for each Rebel starfighter, and is fully illustrated with numerous photographs, schematics, exploded diagrams, and computer-generated artwork by Star Wars vehicle experts Chris Reiff and Chris Trevas. Text is by Ryder Windham, author and co-author of more than 70 Star Wars books. This Haynes Manual is the most thorough technical guide to Rebel starfighters available, and is fully authorized and approved by Lucasfilm.

The Right to Repair Oct 22 2019 In recent decades, companies around the world have deployed an arsenal of tools - including IP law, hardware design, software restrictions, pricing strategies, and marketing messages - to prevent consumers from fixing the things they own. While this strategy has enriched companies almost beyond measure, it has taken billions of dollars out of the pockets of consumers and imposed massive environmental costs on the planet. In *The Right to Repair*, Aaron Perzanowski analyzes the history of repair to show how we've arrived at this moment, when a battle over repair is being waged - largely unnoticed - in courtrooms, legislatures, and administrative agencies. With deft, lucid prose, Perzanowski explains the opaque and complex legal landscape that surrounds the right to repair and shows readers how to fight back.

Alfa Romeo 105 Series Spider Mar 08 2021 The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it details the evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider.

The Rolls-Royce Armoured Car Nov 27 2022 The first Rolls-Royce armoured car was a privately owned vehicle fitted with a machine-gun and a limited amount of armour plate, used by the Royal Naval Air Service in Flanders in 1914. By 1915, nearly 100 had been built and turned over to the Army. From then on, as Sir Albert Stern said 'They searched the world for war', operating as far apart as the northwest frontier of India, the Middle East and southern Africa. The cars were fast, quiet and reliable but above all powerful. 'A Rolls in the desert is above rubies,' said Lawrence of Arabia. After World War I, the War Office continued to produce the Rolls-Royce while tinkering with the design. These further cars served all across the Empire, including in Ireland and even later Shanghai, returning for a final brief appearance in the early stages of World War II. This book tells the complete story of the Rolls-Royce Armoured Car, following its design and development as it fought from theatre to theatre during World War I and the turbulent inter-war years.

Panzer III Dec 05 2020 When Hitler unleashed Operation Barbarossa against the Soviet Union in June 1941, the 23-tonne Panzer III was in the vanguard of the German assault. The German Panzer III tank (official designation Panzerkampfwagen III, Sd Kfz 141, abbreviated to PzKpfw III) saw widespread use during the Second World War campaigns in Poland, France, the Soviet Union and the Balkans, and in North Africa with the famous Afrika Korps. A small number were still in use in Normandy (1944), at Anzio (1943), in Norway and Finland and in Operation Market Garden (1944). Some 5,774 were built between 1937 and 1943. Although the Panzer III was conceived to operate alongside the infantry-supporting Panzer IV to fight other tanks and armoured fighting vehicles, the roles were reversed when the German Army came up against the formidable Soviet T-34 tank. A tank with a more powerful anti-tank gun was needed so the Panzer IV with its larger turret ring and long-barrelled 7.5cm KwK 40 gun was used in tank-versus-tank battles, with the Panzer III being redeployed in the infantry support role. Production of the Panzer III ended in 1943, although its dependable chassis provided hulls for the Sturmgeschütz III (StuG III) assault gun, one of the most successful of the war, until the end of the war.

Centrepiece of the Haynes Panzer III Tank Manual is the Bovington Tank Museum's PzKpfw III Ausf L, which has been restored to running condition. This tank belonged to the same battalion as the museum's famous Tiger I (the 501st (Heavy) Panzer Abteilung) and is an early production Ausf L, modified for tropical service. It was shipped via Naples to Benghazi in Libya in July 1942 and was issued to the 8th Panzer Regiment, part of the 15th Panzer Division and probably fought in the Battle of Alam Halfa. It was subsequently captured by the British Army and shipped to the UK. The Tank Museum has restored the tank to

running order, has repainted it in its original camouflage and markings and is currently replacing many of the ancillary tools and equipment that it carried.

NASA Apollo 11 Jun 10 2021 On July 20, 1969, US astronauts Neil Armstrong and Buzz Aldrin became the first men to walk on the moon. The Apollo 11 mission that carried them and fellow astronaut Michael Collins on their epic journey marked the successful culmination of a quest that, ironically, had begun in Nazi Germany thirty years before. This is the story of the Apollo 11 mission and the 'space hardware' that made it all possible. Author Chris Riley looks at the evolution and design of the mighty Saturn V rocket, the Command and Service Modules, and the Lunar Module. He also describes the space suits worn by the crew, with their special life support systems. Launch procedures are described, 'flying' the Saturn V, navigation, course correction 'burns', orbital rendezvous techniques, flying the LEM, moon landing, moon walk, take-off from the moon, and earth re-entry procedure. Includes performance data, fuels, biographies of Armstrong, Aldrin and Collins, Gene Kranz and Werner von Braun. Detailed appendices cover all of the Apollo missions, with full details of crews, spacecraft names and logos, mission priorities, moon landing sites, and the Lunar Rover.

Cochrane Handbook for Systematic Reviews of Interventions Jan 24 2020 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Building a Special with Ant Anstead Master Mechanic Sep 25 2022 Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system,

ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.
