Applying Guiding Principles of Effective Program Delivery Feb 23 2020 While today's programs continue to grow in size and complexity, at the same time, their success rates remain low. To manage programs effectively in this environment, project managers and program managers must take a "consultative approach" that applies a core set of guiding principles across every function of the program. Applying Guiding Principles of Effective Program Delivery explains what it means to take a consultative approach. Instead of focusing on specific program management techniques, it covers the guiding principles required to make those techniques effective—making it applicable to any program in any industry. It identifies the eight guiding principles of effective program delivery and outlines proven strategies to help program managers succeed in the current environment. Filled with figures, case studies, and templates, the book illustrates the application of these principles across the various program functions—including financial management, schedule management, and resource management. It includes nine cases studies of actual programs from across several industries that demonstrate the application of these principles and their results. Supplying in-depth coverage of each function of the program office, it also contains 20 templates of the key deliverables outlined in the text. Intended for IT professionals tasked with managing large projects or programs, the book is an ideal reference for project managers and program managers who have a fundamental background in project and program management and are ready to improve their skill set and thinking on how to manage their work more effectively. The text concludes by summarizing the key lessons you need to understand to successfully apply the program management tools covered in the text in your own programs.

Recognizing the important roles of the entire educational community, the Texas Model for Comprehensive School Counseling Programs provides examples of how parents, teachers, administrators, principals and school counselors can best contribute to implementation of each of the four components of comprehensive school counseling programs. It provides a developmental framework for a school counseling program curriculum that includes activities at each grade level to enhance students' educational, career, personal and social development.

Wrongful Termination Apr 07 2021 Bay Muckleroy is a modern-day Diogenes, looking for an honest man. His problem lies not in the object of his search, but in the venue—he is a partner in Black West & Merriam, the largest law firm in Dallas, Texas, where honest men are scarce. Bay came up through the ranks of the firm at a time when honor and integrity did not constitute character flaws. But times have changed with the influx of lawyers the firm hired laterally from other law firms. Lawyers like Tripp Malloy, who brought with him ten million dollars' worth of legal business and a sacrifice-truth-for-wealth attitude. Infiltrating the power structure of the firm by the threat of taking their clients and moving on if challenged, Malloy and his ilk have brought a new era to the firm, one that Bay finds distasteful. Enter Meg Kelly—a first-year associate who blows the whistle on Malloy's chronic overbilling of clients. What she couldn't possibly know was that something far more sinister was lurking beneath of the surface of those bloated fee statements. Something that Tripp and the firm needed to keep hidden. When she is fired for insubordination, Meg turns to Bay, her mentor, for help. Unaware of the tempest they are about to unleash, he champions her wrongful termination lawsuit against his own firm. But when they stumble onto a truth that threatens not only Tripp Malloy, but the entire law firm, they soon find themselves both in danger of being wrongfully terminated.

The Everything Store Mar 26 2020 The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as "the definitive account of how a tech icon came to life." Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

Agency Mania Dec 03 2020 Why do some client/agency relationships thrive while others fail? At a time of unprecedented change and complexity in marketing and advertising, Agency Mania will transform the way you look at client/agency relationships and invite you to build sustained partnerships that deliver unmatched work and results. The world of marketing is a trillion-dollar industry and is changing at a drastic pace. The advertiser/agency relationship is under incredible pressure. Some may argue it's even broken. The future of the advertising industry is uncertain. The entire marketing ecosystem is being tested. What will the agency of tomorrow look like? What competencies will agencies need to build? How will they deliver greater value to their clients? Similarly, how will advertisers reap the benefits agencies bring to their table?

How will they become better clients? How will they set their partnerships up for success? In *Agency Mania*, partnership guru Bruno Gralpois demonstrates that these partnerships, once managed professionally, have remarkable transformational value and measurable business impact. The author shines a bright light on the insanity of advertisers and agencies failing to work optimally together or hold each other truly accountable. Building a successful long-term advertiser/agency partnership requires a robust set of competencies and operating principles. *Agency Mania* shows you step-by-step how it is done.

The Decision Model Feb 17 2022 In the current fast-paced and constantly changing business environment, it is more important than ever for organizations to be agile, monitor business performance, and meet with increasingly stringent compliance requirements. Written by pioneering consultants and bestselling authors with track records of international success, *The Decision Model: A Business Logic Framework Linking Business and Technology* provides a platform for rethinking how to view, design, execute, and govern business logic. The book explains how to implement the Decision Model, a stable, rigorous model of core business logic that informs current and emerging technology. The authors supply a strong theoretical foundation, while succinctly defining the path needed to incorporate agile and iterative techniques for developing a model that will be the cornerstone for continual growth. More than this, the Decision Model directly correlates business logic to the business drivers behind it, allowing it to be used as a lever for meeting changing business objectives and marketplace demands. This book not only defines the Decision Model and but also demonstrates how it can be used to organize decision structures for maximum stability, agility, and technology independence and provide input into automation design.

Self-Direction Jan 16 2022 Relates how the self-direction movement was developed, the research that supports it, how the model has spread across the country and the globe, and recommendations and prospects for the future. In the past, when people with disabilities and older adults needed help with activities of daily living and navigating their communities, they rarely had any choice about who helped them, when that support was delivered, or what the worker would or would not do. The self-direction movement changed all that by offering people the option to select their own workers and even create an individualized budget to help them live more independently. Written by experts who played a key part in the growth, evaluation, and dissemination of this revolutionary approach, *Self-Direction* describes the development of this movement through the authors' personal accounts. Also included are stories from actual participants in the movement who benefitted from this approach and from policymakers who saw how self-direction could help address states' problems. The book's conclusion discusses recommendations that can improve the way self-direction is delivered and how to spread its message so that all people with disabilities can have this choice. Valerie J. Bradley is President Emerita at the Human Services Research Institute. She is the author of several books, including (coauthored with Robert L Schalock and James F. Gardner) *Quality of Life: Applications for People with Intellectual and Developmental Disabilities*. Marc H. Fenton is former partner at Public Consulting Group, Inc. and Founding President of

Public Partnerships, LLC, the country's largest fiscal intermediary for people using self-directed budgets. Kevin J. McKenzie Barber Redux Dec 27 2022 MeKenzie Barber Redux is the story of a reunion of McKenzie Barber (an acquired consulting firm) and Robson Barber (the acquiring firm.) It has been five years following the 1992 merger vote held at the Boca Mirage Club. The merger resulted in capsized careers for many McKenzie Barber Partners and advancements for a select few. John Grunwaldyt, the protagonist, has been a casualty. Since the merger he has been in the Litigation "Penalty Box" flopped in the backwaters of the merged firm's Chemical Industries Practice, left his wife and moved in with a lady named Amanda, a media communications consultant, and his career is in limbo short of vesting in the firm's retirement plan. One of the youngest partner admissions in the history of the firm at age 28, his golden boy career, appears to have landed in a permanent ditch. He is summoned to the office of Dr. Gilbert Ranglanger, Vice Chairman-Human Resources for Robson Barber for an early morning meeting. Dr.Ranglanger's nickname in the corridors of Robson Barber is "Dr. Death". Grunwaldyt assumes he has been summoned to commence termination discussions. Instead Dr. Death proposes that Grunwaldyt organize a Reunion for the McKenzie Barber Partners. He is given the choice, organize the reunion or begin termination discussions. Jon Grunwaldyt begins an odyssey that confronts his past, faces the options of a cloudy future, and leads to a confrontation in the final fork in his career road, a McKenzie Barber Alumni Reunion at the resort hotel called Boca Mirage.

A Lab of One's Own Apr 26 2020 A "beautifully written" (Kirkus Reviews, starred review) memoir-manifesto from the first female director of the National Science Foundation about the entrenched sexism in science, the elaborate detours women have taken to bypass the problem, and how to fix the system. If you think sexism thrives only on Wall Street or Hollywood, you haven't visited a lab, a science department, a research foundation, or a biotech firm. Rita Colwell is one of the top scientists in America: the groundbreaking microbiologist who discovered how cholera survives between epidemics and the former head of the National Science Foundation. But when she first applied for a graduate fellowship in bacteriology, she was told, "We don't waste fellowships on women." A lack of support from some male superiors would lead her to change her area of study six times before completing her PhD. *A Lab of One's Own* is an "engaging" (Booklist) book that documents all Colwell has seen and heard over her six decades in science, from sexual harassment in the lab to obscure systems blocking women from leading professional organizations or publishing their work. Along the way, she encounters other women pushing back against the status quo, including a group at MIT who revolt when they discover their labs are a fraction of the size of their male colleagues. Resistance gave female scientists special gifts: forced to change specialties so many times, they came to see things in a more interdisciplinary way, which turned out to be key to making new discoveries in the 20th and 21st centuries. Colwell would also witness the advances that could be made when men and women worked together—often under her direction, such as when she headed a team that helped to uncover the source of anthrax used in the 2001 letter attacks. *A Lab of One's Own* is "an inspiring read for women embarking on a career or experiencing career challenges" (Library Journal, starred review) that shares the sheer joy a scientist feels when moving toward a breakthrough, and the thrill of uncovering a whole new generation of female pioneers. It is the science book for the #MeToo era, offering an astute diagnosis of how to fix the problem of sexism in science—and a celebration of women pushing back.
