Understanding Ethnic Conflict Apr 05 2021 Understanding Ethnic Conflict provides all the key concepts needed to understand conflict among ethnic groups. Including approaches from both comparative politics and international relations, this text offers a model of ethnic conflict's internationalization by showing how domestic and international actors influence a country's ethnic and sectarian divisions. Illustrating this model in five original case studies, the unique combination of theory and application in Understanding Ethnic Conflict facilitates more critical analysis of contemporary ethnic conflicts and the world's response to them.

A Question of Values Jan 02 2021 Places the work of Johan Galtung in the context of past and current debates in international relations, political theory, and more generally, in the social sciences. This comprehensive and critical account scrutinises Galtung's conceptual icons, such as, positive peace and structural violence.

Social Administration: An introduction to human services management Nov 12 2021 Featuring pragmatic guidelines for all administrators and practitioners in the social services, this book presents both theory and case materials to give the student of social administration a textured understanding of the social agency and its dilemmas and walks the student through the very practical daily problems and challenges. Published in two parts: Volume 1: An Introduction to Human Services Management Volume 2: Managing Finances, Personnel, and Information in Human Services

Competition in Religious Life May 26 2020 In his latest work on the social consequences of religious commitment, Jay Newman reveals in clear and concise fashion the extent to which competitiveness is an essential feature of religious life. His assessment charts various classical strategies that have been proposed for either eliminating such competitiveness or directing it into appropriate channels. After a detailed philosophical analysis of the nature and value of competition, the author examines competition between denominations and within denominations, and considers religious competition in some of its less obvious forms. In the process of evaluating the methods for curbing religious competition advocated by such thinkers as Spinoza and Lessing, as well as by modern ecumenists, the author points the way to a general approach to religious competition that minimizes destructive religious conflicts without ignoring the positive value of religious competition.

Sociology of Organizations Jun 19 2022 A collection of both classic and contemporary studies of organizations that is designed around competing theoretical frameworks, this book examines organizations with attention to structure and objectives interactions among members and among organizations, the relationship between the organization and its environment, and the social significance or social meaning of the organization.

Consensus Decision Making, Northern Ireland and Indigenous Movements Dec 01 2020 Presents a study of social movement decision making through seven case studies. This book focuses on Northern Ireland, where frustration with inter-community conflict resolution spawned a movement promoting intra-community or 'single tradition' programs.

Industrial Organizations and Health Jul 08 2021 Tavistock Press was established as a co-operative venture between the Tavistock Institute and Routledge & Kegan Paul (RKP) in the 1950s to produce a series of major contributions across the social sciences. This volume is part of a 2001 reissue of a selection of those important works which have since gone out of print, or are difficult to locate. Published by Routledge, 112 volumes in total are being brought together under the name The International Behavioural and Social Sciences Library: Classics from the Tavistock Press. Reproduced here in facsimile, this volume was originally published in 1969 and is available individually. The collection is also available in a number of themed mini-sets of between 5 and 13 volumes, or as a complete collection.

Low-intensity Conflict Oct 11 2021 The end of the cold war does not necessarily mean the end of the social and political instability that can lead to low-intensity conflicts. This book provides fresh insights into a difficult subject by bringing together knowledgeable contributors who have the academic expertise, operational experience, and strategic perspective essential to understand

Anthropological Contributions to Conflict Resolution May 18 2022 Anthropological Contributions to Conflict Resolution consists of ten essays that make vividly apparent the variety of ways that anthropological approaches and perspectives can be of practical worth in the resolution of conflicts. The essays represent various subdisciplines in anthropology, including legal and political anthropology, economic anthropology, cross-cultural studies, interpretive approaches, and social network approaches. Conflicts and potential conflicts at many levels are the subjects of the essays. One contributor uses an ethnographic account of Sikh separatists in Punjab, India, to explore fighting resulting from the intertwining of religion and politics. Another essay discusses the role that anthropology played in conceptualizing the legal reforms on an island in the remote western Pacific in relation to the recent emergence of alternative dispute resolution. Conflicts over the commons in an American suburb are examined, as are harmony ideology and adversarial ideology as they are used for both freedom and control at a manufacturing plant. The introductory essay includes a discussion of network models in regard to conflict resolution, and the epilogue cites an agenda for applied research in the area.

Insurgency and Counterinsurgency in Modern War Jun 26 2020 A collection of original works covering all aspects of insurgency and counterinsurgency through a multinational lens, *Insurgency and Counterinsurgency in Modern War* addresses the need to look beyond the United States and other prominent counterinsurgency actors in the contemporary world. It also reassesses some of the latent and burgeoning insurgent organizations and networks around the globe and suggests alternative approaches to understanding insurgency, counterinsurgency, and conventional and asymmetric warfare as they relate to insurgency and counterinsurgency. This book makes significant contributions to international and interdisciplinary discussions regarding the seminal features of insurgency and counterinsurgency in modern warfare. It also relates topics with terrorism in the post-9/11 era, including the historical roots of insurgency, radicalism in Europe, and regional radical groups like al-Qaeda and Lashkar-e-Taiba. It emphasizes how issues around insurgency, counterinsurgency, and terrorism permeate or evolve into particular forms of warfare, military operations, and related governmental activities. Using a diversified lens of analysis, the chapters illustrate key elements that spawn insurgency such as insurgents' beliefs, motivations, aims, leadership characteristics, recruitment methods, operations planning, and responses to state and non-state efforts to contain insurgency. The book also examines how certain terrorist and insurgent operations can remain in the shadows and become secret wars beneath the growing surface threats they pose to the societies in which they breed activity. *Insurgency and Counterinsurgency in Modern War* takes a unique look at a subject that has become widely studied and written about in reaction to modern terrorism and insurgency. It analyzes conditions under which insurgency and counterinsurgency occur from nuanced perspectives that have not previously received full consideration.

Support for interreligious conflict in Indonesia Sep 10 2021

Community and community development Mar 16 2022

The Hidden Structure of Violence Dec 21 2019 Acts of violence assume many forms: they may travel by the arc of a guided missile or in the language of an economic policy, and they may leave behind a smoldering village or a starved child. The all-pervasiveness of violence makes it seem like an unavoidable, and

ultimately incomprehensible, aspect of the modern world. But, in this detailed and expansive book, Marc Pilisuk and Jen Rountree demonstrate otherwise. Widespread violence, they argue, is in fact an expression of the underlying social order, and whether it is carried out by military forces or by patterns of investment, the aim is to strengthen that order for the benefit of the powerful. The Hidden Structure of Violence marshals vast amounts of evidence to examine the costs of direct violence, including military preparedness and the social reverberations of war, alongside the costs of structural violence, expressed as poverty and chronic illness. It also documents the relatively small number of people and corporations responsible for facilitating the violent status quo, whether by setting the range of permissible discussion or benefiting directly as financiers and manufacturers. The result is a stunning indictment of our violent world and a powerful critique of the ways through which violence is reproduced on a daily basis, whether at the highest levels of the state or in the deepest recesses of the mind.

Managing Conflict in Organizations Apr 24 2020 After much debate by business professionals, organizational conflict is now considered normal and legitimate; it may even be a positive indicator of effective organizational management. Within certain limits, conflict can be essential to productivity. This book contributes to the investigation of organizational conflict by analyzing its origins, forms, benefits, and consequences. Conflict has benefits: it may lead to solutions to problems, creativity, and innovation. In contrast, little or no conflict in organizations may lead to stagnation, poor decisions, and ineffectiveness. *Managing Conflict in Organizations* is a vigorous analysis of the rational application of conflict theory in organizations. Conflict is inevitable among humans. It is a natural outcome of human interaction that begins when two or more social entities engage one another while striving to attain their own objectives. Relationships among people or organizations become incompatible or inconsistent when two or more of them desire a similar resource that is in short supply; when they do not share behavioral preferences regarding their joint action; or when they have different attitudes, values, beliefs, and skills. This book examines these root causes of organizational conflict and offers constructive perspectives on its consequences.

Constructive Conflicts Feb 15 2022 *Constructive Conflicts* provides a powerful analytical and empirical framework for analyzing and intervening in large-scale social and political conflicts. Readers follow conflicts as they emerge, escalate, de-escalate, become settled, and sometimes re-emerge, learning how destructive cycles of contention can be disrupted and even reversed.

Social and Political Bonds Jan 26 2023 Profound analysis of potential ways to better balance governmental power and the freedom of the people.

Israeli Society and Its Defense Establishment May 06 2021 First Published in 1984. In this volume, the reader will find seven papers which deal with a broad spectrum of issues not necessarily confined to civil-military relations in their more limited and narrow definition. One will also find reference to the broader issues of the social, economic and political impact of the protracted violent conflict on Israeli society. The volume focuses more on the consequence of the actual management of the war rather than on the decision-making process proper.

Territorial Conflicts in World Society Jul 28 2020 By bringing into dialogue modern systems theory and international relations, this text provides theoretically innovative and empirically rich perspectives on conflicts in world society. This collection contrasts Niklas Luhmann's theory of world society in modern systems theory with more classical approaches to the study of conflicts, offering a fresh perspective on territorial conflicts in international relations. It includes chapters on key issues such as: conflicts and human rights conflicts in the Middle East and sub-Saharan Africa war and violence Greek-Turkish relations conflict theory the role of states in world societal conflicts legal territorial disputes in Australia hegemony and conflict in global law conflict management after 9/11. While all contributions draw from the theory of world society in modern systems theory, the authors offer rich multi-disciplinary perspectives which bring in concepts from international relations, peace and conflict studies, sociology, law and philosophy. *Territorial Conflicts in World Society* will appeal to international relations specialists, peace and conflict researchers and sociologists.

Conflict and the Social Bond Aug 29 2020 Is violent conflict inevitable? What is it in our social nature that makes us conduct wars, genocides and persecutions? The answer lies in how we are programmed to bond and form communities that demand loyalty in order to let us belong. The analysis in this book cuts through the social sciences in order to show the fundamentals of violent conflict. The book investigates conflict at the level of sociality. It reorganises existing theories of conflict under that perspective and brings them to bear upon the link between violence and togetherness. It introduces the key concept of closure to describe the conditions under which human groups start to perceive their position as similar and their reality as polarised. This is how normality starts breaking down and fault lines appear. Violent conflict is then analysed as a reaction that seeks change more rapidly than conditions seem to allow. Global comparative data from numerous studies – including M. Mousseau's works – are used to disentangle the factors that contribute to "democratic peace", that is, the fact that democratic societies do not go to war with each other. This inquiry reveals the new dimension of sociodiversity, which allows societies where individuality is strong to constantly produce alternatives and avoid closure. The book concludes with a coda on peace and sociodiversity which explains how contemporary societies can ensure durable peace and adequate social justice at the same time. Written in a clear and direct style, this volume will appeal to students, researchers and scholars with an interest in political sociology, anthropology, international relations, war studies, as well as conflict and peace studies.

Initiation of Educators into Educational Management Secrets Jan 22 2020 This book provides a comprehensive method for learning modern management processes, and applying those methods to improve leadership in educational settings. The authors include case studies and techniques to solve a variety of managerial problems so that members of the educational community may improve their abilities and skills in a range of related disciplines, including: strategic planning, effective decision making, time management, management conflict strategies, oral communication, management strategies for school crises, and the development of good relations and a cooperative spirit.

The New Politics of Conflict Resolution Mar 04 2021 This book shows that the conflict resolution field often denies difference even as it attempts to implement a progressive and responsive politics. Innovative theoretical analysis suggests ways of responding anew across difference and beyond dominant ways of thinking about political community and conflict.

Research in Organizational Behavior Mar 24 2020 This volume celebrates the first quarter century of publishing *Research in Organizational Behavior*. From its inception, *Research in Organizational Behavior* has striven to provide important theoretical integrations of major literatures in the organizational sciences, as well as timely examination and provocative analyses of pressing organizational issues and problems. In keeping with this tradition, the current volume offers an eclectic mix of scholarly articles that address a variety of important questions in organizational theory and do so from a diverse range of disciplinary perspectives and theoretical orientations. A number of the chapters also directly engage contemporary events and dilemmas of considerable importance.

The Conflict Helix Sep 22 2022 This is a book on conflict and consensus aimed at the general reader. In active, plain and direct language it makes the seemingly abstract and complex issues simple. Its view of peace is well-rounded, tough-minded, one that well understands the difficult world of social and personal violence and conflict. At its heart is a simple finding: "to wage peace we need to foster freedom." The human race can best achieve that simple aim by "leaving people alone to form their own communities." "The Conflict Helix" avoids the ambiguous in favor of the categorical; the hedged, qualified statement for the direct Rummel presents a series of basic principles, each concerning an aspect of conflict and peace - psychological, interpersonal, societal, international - and each aspect having its own master principle. These principles are not mere organizational props, but are deeply theoretical and empirically fundamental. The volume expresses the core ideas, results and conclusions of Rummel's major, five-volume work on "Understanding Conflict and War." In discarding technical material and focusing on principles and meaning, "The Conflict Helix" presents an executive summary of a lifetime of work in a digestible form. In light of recent events in Europe, Asia and Latin American this work takes on a special poignancy for the developing no less than the industrialized worlds. Hence, this book should be of value to the general reader as well as professionals and advanced students of international politics.

The War Game Dec 13 2021 War gaming has become a characteristic feature of modern life. From amateur clubs to professional academicians playing the war game in the company of military circles, we have come up against the phenomenon of the "robotization" of human life. Irving Louis Horowitz argues that those who protest the idea that war is a game do so on moral grounds that leave unanswered tough questions: What is the alternative to playing the game? What will become of us if we allow the opponent to become the better "player" in an all-or-nothing game of extinction? Horowitz provides answers in a logical manner while focusing on facts and ethical alternatives to risky ethics. The work is divided into three sections: The New Civilian Militarists, Thermonuclear Peace and Its Political Equivalents, and General Theory of Conflict and Conflict Resolution. Included are such topics as arms, policies, and games; morals, missiles, and militarism; and conflict, consensus, and cooperation. Horowitz concludes that it is time to register the fact that the basic option to destructive uses of science is not traditional morality, but better science a science of survival. With a new introduction by Howard Schneiderman along with a major essay and other materials not included in the original edition, this classic work is a worthy contribution to intellectual debate in the twenty-first century and a must read for military strategists, sociologists, and historians.

Land Use Problems and Conflicts Jul 20 2022 The causes, consequences and control of land use change have become topics of enormous importance in contemporary society. Not only is urban land use and sprawl a hot-button issue, but issues of rural land use have also been in the headlines. Policy makers and citizens are starting to realize that many environmental and economic issues have the question of land use at their very core. Comprising papers from a conference sponsored by the Northeast Regional Center for Rural Development, *Land Use Problems and Conflicts* draws together some of the most up-to-date research in this area. Sections are devoted to problems in the United States and Europe, the consequences of such problems, land use-related data and alternative solutions to conflict. With a lineup including some of the best scholarship on this subject to date, this volume will be of use to those studying environmental and land use issues in addition to policy makers and economists.

The Sociology of Race Relations Oct 19 2019 These readings chronicle the triumphs and failures of race relations in our nation, unfolding the tensions and struggles of racial conflict through the analyses of sociologists writing since the late nineteenth century. The forty-five articles gathered here are drawn from four of the most respected journals in the field: "American Journal of Sociology", "American Sociological Review", "Social Forces", and "Social Problems". Together, they document the problem of the 'color-line', providing for various eras the contemporary rationale for the status quo as well as farsighted calls for change. Thus, the readings reveal how sociological thought reflected racial tensions in this century while simultaneously serving as a force for reform. "The Sociology of Race Relations" covers seven historical periods, each introduced by an incisive discussion of the racial milieu of the time. It begins with the era of Jim Crow laws and the great black migration from the South and proceeds to the reappearance of the Ku Klux Klan in the '20s, the Depression years, the Japanese-American internment during the Second World War, the deceptively quiet '50s that culminated in the civil rights movement of the '60s. It concludes with a look at desegregation in the '70s, the aftermath of the policies of the preceding decade. Although the majority of selections deal with the problems of black Americans, articles on Mexican-Americans and Japanese-Americans as well as on prejudice in general broaden the scope of the book. The editor's introduction places the entire volume in historical and sociological context. A time capsule for viewing race relations, and the development of sociological understanding of race relations, "The Sociology of Race Relations" illustrates two of the discipline's major contributions to American life: its ability to heighten our sensitivity to unnoticed relationships and to debunk simplistic beliefs.

Conflict Management and Resolution Sep 29 2020 *Conflict Management and Resolution* provides students with an overview of the main theories of conflict management and conflict resolution, and will equip them to respond to the complex phenomena of international conflict. The book covers these four key concepts in detail: negotiation, mediation, facilitation, reconciliation. It examines how to prevent, manage and eventually resolve various types of conflict that originate from inter-state and inter-group competition, and expands the existing scope of conflict.

Constructive Conflicts Apr 17 2022 This comprehensive analysis of all kinds of social and political conflicts reveals an important, but neglected truth: conflicts often are waged constructively. Drawing on past and current theory, research, and practice, *Constructive Conflicts* presents a systematic and coherent approach to understanding how a wide variety of struggles can be waged constructively in a new global context. Visit our website for sample chapters!

Towards a Global Community Nov 24 2022 This book is the outcome of a global study undertaken on behalf of the World Education Fellowship (WEF) in collaboration with UNESCO. It provides education policy makers with evidence to support programs that address the major challenges faced by education systems in the next decade. It contains case studies, and it expands on the work done by UNESCO's International Commission on Education for the 21st Century (the Delors Report).

Readings in Managerial Psychology Feb 27 2023 With more than half the papers new to this book, the fourth edition of *Readings in Managerial Psychology* represents a substantial revision of this popular text. This edition focuses more than ever on the managing process, both within and between organizations, and such "soft" issues as managing creativity and imagination, managers' values and beliefs, and organizational culture play a larger role than they have before. *Readings in Managerial Psychology* is designed for managers in business and industry, students of management, public and university administrators, and executives in other organizations. The collection can be used independently or as a companion volume to Harold J. Leavitt and Homa Bahrami's *Managerial Psychology: Managing Behavior in Organizations* (5th edition, 1988), also published by the University of Chicago Press.

Encyclopedia of African Colonial Conflicts [2 volumes] Oct 23 2022 Two volumes introduce the history of colonial wars in Africa and illustrate why African countries like the Democratic Republic of Congo, Nigeria, Somalia, and Sudan continue to experience ethnic, political, and religious violence in the early 21st century. • Begins with a helpful introduction and overview of the topic • Contains alphabetical entries on wars, campaigns, battles, leaders, and other topics related to European colonial conquest in Africa • Includes African rebellions against the early colonial states in the 1890s and early 1900s • Features entries written by scholars in the fields of history and politics • Covers all major regions of Africa as well as relevant European powers • Provides a list of additional sources for further reading

Theories of Violent Conflict Jun 07 2021 This revised and updated second edition introduces students of violent conflict to a variety of prominent theoretical approaches, and examines the ontological stances and epistemological traditions underlying these approaches. *Theories of Violent Conflict* takes the centrality of the 'group' as an actor in contemporary conflict as a point of departure, leaving us with three main questions: • What makes a group? • Why and how does a group resort to violence? • Why and how do or don't they stop? The book examines and compares the ways by which these questions are addressed from a number of perspectives: primordialism/constructivism, social identity theory, critical political economy, human needs theory, relative deprivation theory, collective action theory and rational choice theory. The final chapter aims to synthesize structure and agency-based theories by proposing a critical discourse analysis of violent conflict. With new material on violence, religion, extremism and military urbanism, this book will be essential reading for students of war and conflict studies, peace studies, conflict analysis and conflict resolution, and ethnic conflict, as well as security studies and IR in general.

Critical Issues in Peace and Conflict Studies Dec 25 2022 *Critical Issues in Peace and Conflict Studies: Theory, Practice, and Pedagogy*, edited by Thomas Matyók, Jessica Senehi, and Sean Byrne, discusses critical issues in the emerging field of Peace and Conflict Studies, and suggests a framework for the future development of the field and the education of its practitioners and academics. Contributors to the book are recognized scholars and practitioners in their respective fields. The authors take an holistic approach to the study, analysis, and resolution of conflict at the micro, meso, macro, and mega levels.

Psychological Components of Sustainable Peace Feb 03 2021 Scholarship on the psychology of peace has been accumulating for decades. The approach employed has been predominantly centered on addressing and preventing conflict and violence and less on the conditions associated with promoting peace. Concerns around nuclear annihilation, enemy images, discrimination, denial of basic human needs, terrorism and torture have been the focal points of most research. *The Psychological Components of a Sustainable Peace* moves beyond a prevention-orientation to the study of the conditions for increasing the probabilities for sustainable, cooperative peace. Such a view combines preventative scholarship with a promotive-orientation to the study of peaceful situations and societies. The contributors to this volume examine the components of various psychological theories that contribute to the promotion of a harmonious, sustainable peace. Underlying this orientation is the belief that promoting the ideas and actions which can lead to a sustainable, harmonious peace will not only contribute to the prevention of war, but will also lead to more positive, constructive relations among people and nations and to a more sustainable planet. *The Psychological Components of a Sustainable Peace* is valuable and stimulating reading for researchers in peace psychology, political psychology, and conflict resolution as well as others who are interested in developing a sustainable, harmonious world.

Mediation Aug 09 2021 Because the intervention of a neutral third party is currently gaining favor as an alternative form of dispute resolution, this book explores the process of mediation in the context of managing struggle and examines some of the characteristics of mediators, their training and ethics, and the techniques and skills of good mediation. The theory section of the book contains three chapters dealing respectively with basic concepts and contexts, origins and development of mediation, and the mediator. The chapters in the section on practice are as follows: (1) "The Mediator in Action"; (2) "Phases in the Mediation Process"; (3) "Mediator Behaviors: Relationships, Processes, and Strategies"; (4) "Power and the Mediator"; (5) "You Are the Mediator: a Summary of Suggestions"; and (6) "Helping the Parties Use Mediation." The five appendixes include simulated cases for mediation, mediation analysis and evaluation forms, special exercises for mediators-to-be, a section on special projects, and a sample agreement between parties coming to mediation. Eighty-one references are included. (Skc).

Indigenous Conflict Management Strategies in West Africa Aug 21 2022 *Indigenous Conflict Management Strategies in West Africa: Beyond Right and Wrong* expands the discourse on indigenous knowledge. With several examples and case histories, the work defines, characterizes, and explains indigenous conflict management strategies in West Africa, particularly in Ghana, Nigeria, and Cameroon. The book critically evaluates indigenous conflict management strategies with a view to determining their effectiveness in the context of the societies' history and culture, and the relevance and adaptability of these strategies in

contemporary contexts. This book takes a scholarly approach, avoiding romanticizing or idealizing indigenous conflict management strategies in West Africa. It advocates a set of mechanisms by which the best elements of indigenous knowledge and skills in conflict management may be deployed to settle contemporary disputes, and made portable for adoption and adaptation by other complex societies in the region and beyond.

Handbook of Bureaucracy Oct 31 2020 This encyclopedic reference/text provides an analysis of the basic issues and major aspects of bureaucracy, bureaucratic politics and administrative theory, public policy, and public administration in historical and contemporary perspectives. Examining theoretical, philosophical, and empirical interpretations, as well as the intricate position of bureaucracy in government, politics, national development, international relations, and a host of other institutions, the book focuses on the multifunctional role of public bureaucracies in societies with various socioeconomic, political, cultural, and ideological orientations and covers a wide range of processes and subjects.

The Intermediaries Feb 21 2020 The possibilities for third-party intervention aimed at facilitating the non-violent termination of international crises are explored in this book. The author develops a theory of third-party intervention at a high level of abstraction and then presents a set of applications which focuses on the Secretary-General of the United Nations and a variety of potential Soviet-American crises. Originally published in 1967. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The War System Jan 14 2022 An interdisciplinary study of this nature and scope reflects contributions of many scholars in diverse disciplines and fields concerned with human conflict behavior in general and with human war-prone behavior in particular. They are too numerous to enumerate here. Still, our deep gratitude goes to those scholars whose writings have been incorporated in this volume as "sample representatives" of what their particular disciplines can contribute to the study of war.

Foreign Policy and the Developing Nation Nov 19 2019 Eight well-known political scientists, economists, and sociologists here explore the interrelationships between the various levels of economic strength and political stability attended by newly emerged nations and the formulation of their foreign policies. These essays provide testimony not only to the importance of these problems, but also to contributions that can be made by various methodological approaches by scholars from the different social sciences. Contributing to the volume are Rupert Emerson, Benjamin Higgins, Gayl Ness, Ivo and Rosalind Feierabend, Henry Bienen, Lloyd Jensen, and Wilson C. McWilliams.
