Cutting Edge Conversations

Dec 15 2021 EJ 'Ted' Cutting was not only Aston Martin's most successful Chief Race Car Design Engineer, but was also an innovator with influential force on the worldwide automotive industry.

Originating from a limited edition hardback version, this eBook was produced in celebration of the 60th anniversary of Aston Martin winning the World Sports Car Championship for Britain with the all-conquering DBR1 designed, engineered and created by Ted himself. Rather than a traditional biography of his life, Ted wanted his book to be rather less scripted and informal; it was therefore initially adapted from a number of recorded conversations between himself and Aston Martin Heritage Trust members Stuart Bailey and Brian Joscelyne - the title being an obvious choice considering this! In addition to the in-depth telling of a legendary period in British motorsport by a man at the centre of it all, the book

also sees Ted clarify a number of details which have in the past been incorrectly reported. Unusually it also contains all his published documents and access to a 90 minute video of his unique lecture on 'Racing Astons' to further endorse his story. Although the original hardback edition of this book was produced only in a limited run, Ted's wish was to make the complete book available to a much wider audience, now possible through the internet; as an engineer always working at the cutting edge of technology, he would appreciate the benefits of information sharing in the digital age. As well as being of interest to fans of Aston Martin and of motorsports in general, the book is a compelling read for any student of automotive design and engineering; after all, progress is about standing on the shoulders of giants - and in the field of race car design, few individuals ever reach the colossal heights achieved by Ted Cutting.

The Science of James Bond Apr 26 2020 The science behind the gadgets, exploits, and enemies of the world's

greatest spy From the sleek Aston Martin that spits out bullets, nails, and passengers at the push of a button to the microjet that makes hairpin turns to avoid a heat-seeking missile, the science and technology of James Bond films have kept millions of movie fans guessing for decades. Are these amazing feats and gadgets truly possible? The Science of James Bond takes you on a fascinating excursion through the true science that underlies Bond's most fantastic and off-the-wall accoutrements. The acclaimed science-fiction authors Lois Gresh and Robert Weinberg provide a highly entertaining, informative look at the real-world achievements and brilliant imaginations behind such singular Bond gadgets as the buzz-saw Rolex, the car that turns into a submarine, and the ever-popular rocket-firing cigarette. They examine hundreds of Q Division's ingenious inventions; analyze Bond's astonishing battles beneath the earth and sea, in the skies, and even in outer space; and ask intriguing questions that lead to enlightening discussions about the limits of science, the laws of nature, and the future of technology. Filled with entertaining anecdotes from Bond movie shoots and supplemented with "tech" ratings for all of the Bond movies, The Science of James Bond separates scientific fact from film fantasy--with some very surprising results.

Schroeder's Collectible Toys Antique to Modern Price Guide Nov 21 2019 Of the many toy books on the market today, only one tackles the enormous and varied field head-on Schroeders Collectible Toys, Antique to Modern! This book has been highly acclaimed and enthusiastically accepted by toy collectors and dealers all over the country. Backing the editors is a fantastic team of researchers and advisors who carefully check every line for up-to-the-minute accuracy. Though primarily a price guide, the book also contains coded dealer listings devised to help the reader track down and purchase those hard-to-find items.

The Jowett Jupiter - The car that leaped to fame May 08 2021 From the Jupiter's inception and development, to its sporting successes, and its current status as a sought-after classic, 'Jowett Jupiter - the Car that Leaped to Fame' is a unique book by Edmund Nankivell, the world authority on the Jupiter, and is a complete study of the model. With its advanced chassis

designed by Dr Eberan-Eberhorst, the noted Austrian engineer who was also responsible for designing the Auto Union Type D Grand Prix car, the Jowett Jupiter was an instant hit. Its responsive handling and lively engine made the Jupiter a great sporting success from the off, with a record-breaking win at the Le Mans 24 Hours in 1950, and a class 1-2 win at the 1951 Monte Carlo International Rally. This book covers the Jupiter's success across the board, revealing the full chronology of the model, its racing derivatives, and the special-bodied Jupiters from the likes of Stabilimenti Farina and Abbott of Farnham. With chapters detailing Jupiters in current use, historic racing, and concours events, this new edition includes more images and updated information, and provides a comprehensive record of this fantastic, historic car. eBook ISBN:

Equipping James Bond Dec 27

2022 James Bond's amazing gadgets reveal both enthusiasm about technology and fear of its potential ramifications. The popularity of the 007 franchise depends on a seductive formula of sex, violence, and snobbery. Much of its appeal, too, lies in its gadgets: slick, somewhat improbable technological devices that give everyone's favorite secret agent the edge

over his adversaries. In *Equipping James Bond*, André Millard chronicles a hundred-year history of espionage technology through the lens of Ian Fleming's infamous character and his ingenious spyware. Beginning with the creation of MI6, the British secret service, Millard traces the development of espionage technology from the advanced weaponry of the nineteenth century to the evolving threat of computer hacking and surveillance. Arguing that the gadgets in the books and films articulate the leading edge of technological awareness at the time, Millard describes how Bond goes from protecting 1950s England from criminal activity to saving a world threatened by nuclear bombs, poison gas, and attacks from space. As a modern and modernizing hero, Bond has to keep up with the times. His film franchise is committed to equipping both Bond and his adversaries with the latest technological gadgets. Simultaneously, Millard stresses, the villains and threats that Bond faces embody contemporary fears about the downside of technological change. Taking a wide-ranging look at factual (and fictional) technology, Millard views the James Bond universe as evidence for popular perceptions of technological development as both inevitably progressive and apocalyptically threatening.

The Motor Apr 19 2022

A Race with Infamy Jul 22

2022 On June 11, 1955, Lance Macklin became a central player in motor racing's worst

tragedy. Not only did that day at Le Mans scar him forever, but it went on to become his most lasting legacy. Who, many over the years have asked, was that 'gentleman driver' in the Healey? One thing's for sure: he was no amateur. That day overshadowed the remarkable career of one of British racing's leading lights, of a driver who befriended and mentored champions, who was stunningly quick on the track and charming off it. Featuring a wealth of archival material and new interviews, this book finally tells the fascinating story of one of motorsport's most underrated and misunderstood talents.

Aston Martin DB Mar 01 2023

Read the full story of Great Britain's best-loved sports car manufacturer with Aston Martin DB, an exquisitely produced, photo-loaded, history by Aston Martin expert, Andrew Noakes. The name David Brown is synonymous with the glory days of Aston Martin, when a tiny British sports car company was rescued from near-extinction and turned into a marque that could compete with Ferrari--and win. Stylish design, lavish illustration from the Aston Martin Heritage Trust and meticulously researched text come together in this large-

format, 224-page book to create a superb celebration of the 70th anniversary of DB Aston Martins in 2017. There's a wealth of detail on the Aston Martin DB road and race cars, both from the David Brown era of 1947-1972 and the modern DB era from 1993 onwards, together high quality images and specification tables for all the key models. Aston Martin DB 70 Years is a fitting celebration of one of the world's most enduring sports cars. The fast, beautiful sports cars that Aston Martin built under Brown's ownership won the Le Mans 24-hour race and the World Sports Car Championship, and provided James Bond with his most famous transport: the ejector-seat equipped DB5 that won acclaim in Goldfinger. Though the DB era ended when Brown sold the company in 1972, its influence continued to be felt. James Bond's most recent car, the specially-made DB10, and Aston Martin has just launched its most complete car ever, the DB11. 'DB' means as much to Aston Martin now as ever.
