or go all in. Once "warehoused" in institutions, many severely handicapped individuals are now living in community residences. Yet there are few resource materials available for those who face the difficult task of planning and operating these residences. A User's Guide to Community Entry for the Severely Handicapped offers practical guidance for creating the most home-like, least restrictive residential settings. Committed to the right of all individuals to live in their home community, Pancsofar and Blackwell address topics of vital concern to residential planners, administrators, and direct care personnel. The Guide covers administrative and programmatic issues, offering a wealth of suggestions, examples, forms, and checklists. It is a valuable special education textbook and reference work, and an excellent resource for families. In the decade and a half since the publication of the Second Edition of A User's Guide to Vacuum Technology there have been many important advances in the field, including spinning rotor gauges, dry mechanical pumps, magnetically levitated turbo pumps, and ultraclean system designs. These, along with improved cleaning and assembly techniques have made contamination-free manufacturing a reality. Designed to bridge the gap in both knowledge and training between designers and end users of vacuum equipment, the Third Edition offers a practical perspective on today's vacuum technology. With a focus on the operation, understanding, and selection of equipment for industrial processes used in semiconductor, optics, packaging, and related coating technologies, A User's Guide to Vacuum Technology, Third Edition provides a detailed treatment of this important field. While emphasizing the fundamentals and touching on significant topics not adequately covered elsewhere, the text avoids topics not relevant to the typical user. Household appliances encompass a large variety of equipment including the cold appliances (refrigerators and freezers), the wet appliances (washing machines, dishwashers and dryers), the space conditioning appliances (heaters, air conditioners, heat pumps, fans, boilers), the water heaters, the cooking appliances, a wide array of consumer electronics (such as TVs, VCRs, HiFi systems) and miscellaneous small appliances (such as vacuum cleaners, irons, toasters, hairdryers and power tools). Household appliances save a large amount of domestic labour to perform the household tasks, as well as provide comfort conditions and convenience to the household occupants. The European Community SAVE Programme has promoted the efficient use of energy, in particular in domestic appliances. SAVE has sponsored a variety of studies to characterise the use of the main household appliances and lighting and to identify cost-effective technical options to improve the energy efficiency, as well as to identify the strategies to promote the penetration of efficient equipment in the market place. National energy agencies, independent experts and appliance manufacturers have participated in the SAVE activities and have done a remarkable job. While the energy efficiency of the main household appliances has been improved, at the same time it was possible in most cases to improve the appliance performance, reliability and quality of service. *Revealing/Reveiling Shanghai* provides international and interdisciplinary perspectives on representations of Shanghai, a contested location within political discourse and cultural imagination. Shanghai's complex history as a quasi-colonial city, and its contradictory identity as the birthplace of Communist China and the epitome of twenty-first-century capitalism, make it an especially fascinating subject. Contributors examine representations of Shanghai in film, art, literature, memoir, theater, and mass media from the past one hundred years. They address the ways in which texts from the late twentieth and early twenty-first centuries have rewritten past and present Shanghai to reflect our own wishes and anguishes, show how the city resists static interpretations, and challenge notions of authentic representation and identity. By revealing and questioning persistent stereotypes and constructed versions of East and West, the essays offer diverse views so as to create a genuine exchange with contemporary global audiences. A wide variety of texts are discussed, including the films *Street Angel* (1937) and *The White Countess* (2005), and the novels *The Song of Everlasting Sorrow* (1996) and *Shanghai Baby* (1999). "Thinkback is a tool for student empowerment - a strategy they can use to improve both their ability to think and their ability to learn. The Thinkback classroom, on the other hand, is a design for teacher liberation - enabling them to see learning more clearly than they ever could before." "It is the only book currently available that contains detailed models of metacognitive dialogues in the classroom. These dialogues enable teachers and teacher educators to observe thinking processes that previously were invisible and undetectable. Based on more than 20 years of careful cognitive research, the dialogues provide teachers with important insights into the nature of thinking and problem solving. Thinkback is a picture window on the working mind." This book is a tutorial designed to instruct the reader in use and application of immunochemical methods of analysis for environmental contaminants. A brief introduction describes basic principles and the advantages and disadvantages of the technology, and gives a listing of references which supply more detail. Preparation of the laboratory for use of this technology and the general scientific considerations prior to using the technology are discussed. Detailed step-wise procedures are given for analysis of selected analytes, triazine herbicides, carbaryl, paraquat, and p-nitrophenols, etc. In addition to the specific immunoassay methods, a series of support techniques necessary to perform immunochemical methods are described. This book provides specific instruction for certain analytes, but also serves to familiarize the novice reader with many generic concepts needed to successfully utilize immunochemistry technology including: applications, sampling, sample preparation, extraction, cleanup, quality assurance, methods development and optimization, data handling and troubleshooting. It is not necessary for the reader to actually perform the immunoassays given in this user's guide to obtain familiarity with these concepts. The guide is written so that the information presented can be applied to other immunoassays not given here. Thus, the strength of the guide is its universal applicability to immunoassay methods.
